October 2013

Welcome to Pyramid!

Pyramid Tubular Technologies, Inc was founded in 2010, by Patrick Retsel and Tony Montalvo. Today, Pyramid Tube builds and services newly built Pyramid Benders, as well as existing benders from other manufacturers such as Eaton Leonard, AddisonMcKee, Pines, Schwarze-Robitec, Adaptive Motion and several others. Our team has years of experience engineering and building tube forming equipment from start to finish. Our current facilities are located in Flint, MI and include a dedicated machine shop, paint area and 12,000 square feet of fabrication space with an additional 40,000 square feet of expansion space.

Meet Pat & Tony

Spare Parts

We maintain an extensive inventory of commonly needed parts and also manufacture custom replacement parts to order. We provide bearings & rails, collets & fingers, valves & seals, drives & motors, as well as many other component parts. Our Machine Shop can build your new spindle or mandrel rod to your specifications, and with a faster lead time than typical equipment suppliers. Spare parts can be shipped for installation by your in-house maintenance team, or combined with a Service Call for installation by one of Pyramid's experts.

Our Inside Sales & Service Manager, Jamie Retsel, has over 16 years of experience with tube benders and tube forming equipment. Having painted, built, serviced, and purchased all of the components for tube forming equipment, his expertise is invaluable when replacement parts are needed and he is always happy to help.

Service & Repairs

As a full-service manufacturer, we partner with our clients to deliver solutions that help solve their most complicated needs. Our in-house Machine Shop produces parts for equipment manufactured by Eaton Leonard, AddisonMcKee, Pines, Schwarze-Robitec, Adaptive Motion and several others. Utilizing decades of industry experience and functional expertise, Pyramid Tubular Technologies goes beyond the norm to provide both parts and service to minimize down-time and keep your current equipment working for you.

Rebuilds

Our goal is to help make your business as efficient and profitable as possible. We will work with you to help solve your problems, while understanding that you have limited resources and budget. Rebuilding existing equipment can decrease down-time and keep your equipment looking, and functioning, like new. Upon completion of any Rebuild, we will provide you with a Spare Parts List, Updated Electrical & Mechanical Layouts, and a 1 Year Warranty for work performed.

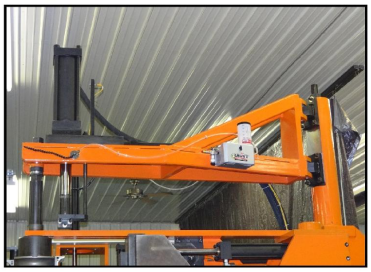
Retrofits



If you're interested in a more complex retrofit, our team's years of experience are an invaluable tool. We will work with you to upgrade your existing Eaton Leonard, AddisonMcKee, Pines, Schwarze-Robitec, or Adaptive Motion equipment to meet your current needs. We can add a sheer, Y-Axis push, upgrade controls, or convert your single-stack to a multi-stack bender. We provide a comprehensive quote detailing all work to be performed & our team is available to discuss progress at any time. Upon completion of any Retrofit, we will provide you with a Spare Parts List, Updated Electrical & Mechanical Layouts, and a 1 Year Warranty for work performed.

New Builds

Our PT3000 & PT4000 lines of Tube Benders are state of the art and fully customizable. Our benders include all digital drives, linear rails & bearings and off-the-shelf components. Whether you're looking for a Hybrid (Electric/Hydraulic) Machine, or choose the All Electric option; if you need a single stack or multi-stack, we can build new machines with any number of upgrades or options.

BendPro G2 Controls

Controls Any CNC Bender

BendPro G2 is the most popular CNC bender control in the industry. Customers tell us that it offers the highest performance and functionality of any CNC bender control on the market, and is the easiest to use.

- Installation at your location
- Import from any CAD program
- Advanced Teach Modes simplify programming & optimize cycle times
- 3D simulation options available
- Backed by best support in the industry
- Industrial PC w ith touch screen and bright, easy to read 15" LCD
- Window s 7 operating system w ith remote diagnostics
- Netw orks w ith office PCs, measuring machines, and the internet
- Off the shelf components are readily available w orldw ide
- Unlimited part storage via resident disk drives or office netw ork
- High performance servo control assures fast and accurate production
- No Servo Cards or Motion Controllers (Increases performance and reliability)
- Imports programs from office computers
- Displays and rotates 3D image of programmed part in real time
- Easy to use control screens w ith graphical representation of bender
- Open and closed Collet modes supported
- Hitch moves and recapture in zones supported
- Advanced diagnostics make troubleshooting problems a snap
- Interfaces to measuring machines made by Eaton Leonard, Multi Systems, Romer, etc
- Interfaces to robotic loaders and unloaders (Including CNC Bender Cells)
- Office softw are available for 'offline' programming and pre-bending checks
- Office softw are available for simulation
- And much more...

Auxiliary Equipment

Our team has experience designing, building, and repairing nearly all tube forming & fabricating equipment. Please request a quote today for debundlers, auto-loaders, end formers, tooling, or any other specialty equipment. You'll work directly with experienced engineering and design personnel to develop the ideal equipment for your business.
