

1 Decline Belt Conveyor

The Model is a floor-to-floor incline or decline conveyor. It is equipped with an adjustable double nose-over at the discharge end to insure a smooth transfer from incline or decline to horizontal plane.

Detailed Product Description:

Decline Belt Conveyor of China

Bed - Stainless Steel Galvanized Carbon Steel Aluminum Section

Belt Widths: 50-1200mm

End Drive (standard)

Driving Mode – Motor Reducer

Adjustable Floor Supports Available

Reversible (with Center Drive)

2 Incline Belt Conveyor

The Model is a floor-to-floor incline or decline conveyor. It is equipped with an adjustable double nose-over at the discharge end to insure a smooth transfer from incline or decline to horizontal plane.

Detailed Product Description:

Incline Belt Conveyor of China

Bed - Stainless Steel Galvanized Carbon Steel Aluminum Section

Belt Widths: 50-1200mm

End Drive (standard)

Driving Mode – Motor Reducer

Adjustable Floor Supports Available

Reversible (with Center Drive)

3 Horizontal Belt Conveyor

A very versatile conveyor, the Horizontal Belt Conveyor can be used in many types of material handling situations such as assembly line operations, sorting, packing, and inspection. Conveyor sets up quickly and easily to save on installation time.

Detailed Product Description:

Belt Conveyor of China

Bed - Stainless Steel Galvanized Carbon Steel Aluminum Section

Belt Widths: 50-1200mm

End Drive (standard)

Driving Mode – Motor Reducer Dynamoelectric Roller

Adjustable Floor Supports Available

Reversible (with Center Drive)

4 Belt Curves

The Belt Curves provides a positive flow of product by means of a belt, driven by tapered pulleys. Conveyor is a versatile in that it can transport a wide variety of products. Available from 30° to 180° turns.

Detailed Product Description:

China Conveyor Belts

Bed - Stainless Steel Galvanized Carbon Steel

Belt - Black or Green PVC Belt.

Belt Widths:50-1200mm

Motor - Motor Reducer

Adjustable Floor Supports Available

5 Accumulating Roller Conveyor

Accumulating roller conveyors provide a way to hold product on the conveyor until given a signal to release the product. Available from 30° to 180° turns. Typical applications include feeding product to a machine such as a assembly line operations, sorting, packing, and inspection.

Detailed Product Description:

Roller Conveyor of China

Bed - Stainless Steel Galvanized Carbon Steel Aluminum Section

Types of Drive: Tangential Drive Roller-to-Roller Drive (Chain)

Roller Widths: 50-1500mm

Roller Material: Stainless Steel Roller Zinc Plated Steel Roller Aluminium Roller
PVC-Copolymer Roller Rubber-Covered Roller

Adjustable Floor Supports Available

Standard types of spindle: Spring-loaded Spindle Female Threaded Spindle(Different types of spindle are available on request.)

6 Roller Conveyor

The powered roller conveyor is a general transport conveyor Either way a powered roller conveyor provides quiet operation, versatile design and easy installation and maintenance. Available from 30° to 180° turns. This makes the powered roller conveyor a valuable component in operations requiring high performance with minimal downtime.

Detailed Product Description:

China Roller Conveyor

Bed - Stainless Steel Galvanized Carbon Steel Aluminum Section

Roller Widths: 50-1500mm

Roller Material: Stainless Steel Roller Zinc Plated Steel Roller Aluminium Roller
PVC-Copolymer Roller Rubber-Covered Roller

Standard types of spindle: Spring-loaded Spindle Female Threaded Spindle(Different types of spindle are available on request.)

7 Board Chain Conveyor

The Board Chain Conveyor is mainly used in heavy industry for the production transport in special circumstance. The metal structure is strong driving and the capability is solidness, especially , it is fittest in the conditions of high temperature and some dangerous place.

Detailed Product Description:

Chain Conveyor of China

Bed - Stainless Steel Galvanized Carbon Steel Aluminum Section

Types of Drive: Chain Drive

Platform: Size depends on product

Guards: Expanded metal guarding

Controls: Supplied as required

8 Table Top Chain Conveyor

Table Top Chain Conveyor has always been considered a bottling conveyor as it has been used in the bottling industry for many years. But many different industries have begun to discover the advantages that this type of conveyor can provide. Give us a call and we can discuss how table top chain conveyors can move, accumulate , transfer & sort your products more efficiently.

Detailed Product Description:

China Conveyor Chain

Bed - Stainless Steel Galvanized Carbon Steel Aluminum Section

Chain Widths: 54.5-304.8mm

Chain Material: Metal Plastic

Available from 30° to 180° turns

9 Pallet Handling Conveyor

Pallet handling conveyor mechanically driven by one motor for a smooth and continuous transport of palleted goods. Non-contacting, pallet accumulation and transport. Designed to transport pallet with bottom boards perpendicular to direction of transport.

Detailed Product Description:

China Conveyors

Bed - Stainless Steel Galvanized Carbon Steel Aluminum Section

Bed Widths: 100-1200mm

Driving Mode – Motor Reducer

Adjustable Floor Supports Available

Chain Material: Metal Plastic

Air-operated pallet movement ensures soft start stop

10 Flexible conveyors

Flexible conveyors are designed for versatility. They are exceptional for truck loading and unloading, retail stores, shipping areas, loading docks and plant floors. You can create temporary conveyor solutions in places like loading docks and shipping areas by utilizing flexible conveyors. They are portable, expandable and easy to use. Just extend and curve the conveyor to meet your needs. Dalian Golden offers many conveyors, but other sizes and configurations are available. Detailed Product Description:

Conveyor of China

Bed - Stainless Steel Galvanized Carbon Steel

Roller Widths: 50-1500mm

Roller Material: Stainless Steel Roller Zinc Plated Steel Roller Aluminium Roller
PVC-Copolymer Roller Rubber-Covered Roller

Removable Caster Available

Standard types of spindle: Spring-loaded Spindle Female Threaded Spindle(Different types of spindle are available on request.)

11 Reciprocating Vertical Conveyors

Reciprocating Vertical Conveyors allow an integral conveyor to receive a product at one level, raise it to another level(s), discharge the product, then return to the first level in order to receive another product. They allow you to utilize multiple levels of an are, saving valuable floor space. They can also provide a link between floors in a multi-story building.

Detailed Product Description:

China Conveyor System

Bed - Stainless Steel Galvanized Carbon Steel Aluminum Section

Types of Drive: Chain Drive

Platform: Size depends on product

Guards: Expanded metal guarding

Controls: Supplied as required

12 Rollers

The areas of production and sales are faced with complex procurement and distribution networks, highly diversified product ranges and customer requirements that call for tailor-made solutions. Indeed, against the backdrop of shorter innovation cycles, increasingly complex manufacturing processes and new channels of distribution, materials flow has become a critical success factor. The products of the Golden Group play a pivotal role in helping companies meet the new challenges of materials handling.

Our main focus within the "Drives&Rollers" business . Our conveyor rollers contribute to the overall efficiency and quality of materials handling - in all industries, throughout the world. Interroll components form the basis for efficient materials handling.

Typical applications include:

Rollers of China

Postal and document handling
Food-processing industry
Assembly lines in the electronics industry
Machine linking in automation
Production plant in all industries
Dispatch lines in all industries
Packaging lines for all products
Order-picking systems for pharmaceuticals wholesalers
Pallet transport in beverage distribution
Luggage handling
Cargo handling
Supermarket check-outs
Etc.

14 Roller Conveyors

China Dalian Golden Conveyor Co., Ltd. specializes in a variety of conveyors. Technical strength in the manufacture of conveyors has many years of experience. Now we have products across the country, as well as exported to Europe and the United States in Southeast Asia. Main products : screw [conveyor](#), belt [conveyor](#), roller conveyors, conveyor components, roller, aluminum profile and so on.

In recent years, companies continue to adjust product structure, and gradually increase the types of products, and has done a great deal of effort to improve and improve product quality. We are always committed to provide customers with cost-effective, high-precision, high-quality products. Excellent product quality and perfect after-sales service to enable our company to win a high degree of recognition of domestic and foreign customers.
