The company that provides Solutions to your *Metal Removal Challenges*

Texas Machinery Company, Inc., your first and best choice for machine tools. At TMC, we have the highest degree of honesty and integrity, and we take pride in the products and services we offer.

We are dedicated to quality; quality of our products, quality of our service, quality of our customer relationships and quality of our promises. Our goal is to provide the very best machine tools and related products at the most affordable prices, coupled with the highest quality of service and support after the sale.

We are committed to helping companies implement innovative solutions to meet manufacturing challenges and achieve a high standard of quality with superior results.

Our Sales Staff, Application Engineers and Service Technicians are committed to helping the customer select, install and operate the best equipment to most effectively manufacture specific quality parts. Our commitment to the customer starts with the sale, continues through the timely installation, beyond the warranty and throughout the life of the product.

TMC distributes a broad range of precision metal-cutting machine tools including CNC and Manual Milling and Turning Machines, EDM Machines and Grinding Machines.

TMC Proudly Represents these Quality Machine Tool Products

ETXE-TAR provides
Turnkey Solutions for
the Automotive and
Heavy-Duty Industries.

GMTK's objective is to work with the customer to increase competitiveness and profitability of the customer's products and services through designs adapting to the real needs of each production process and by offering ground-breaking products as far as applied technology is concerned.

The ACCURACER VR is manufactured with the most modern existing technology and it is conceived for tasks of high performance in the machining of complex pieces with high precision and added value.

The applied technology allows exceptional dynamics with top-quality power capacities.

Table Sizes: 63" to 157"

Horse Power: 30 to 80

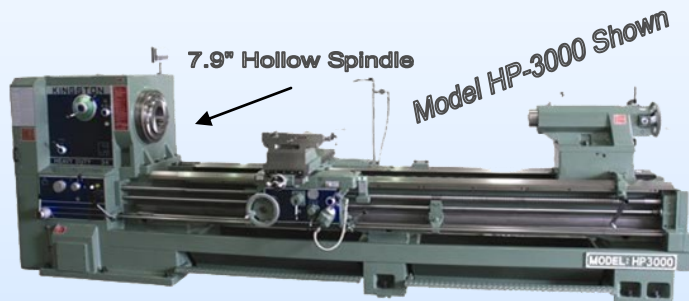

Control: Fanuc FS31i-A

Tool Capacity: 40 to 200

Live Tooling Available

KINGSTON

Kingston Machine Tool Manufacturing, Inc.

7.9" Hollow Spindle

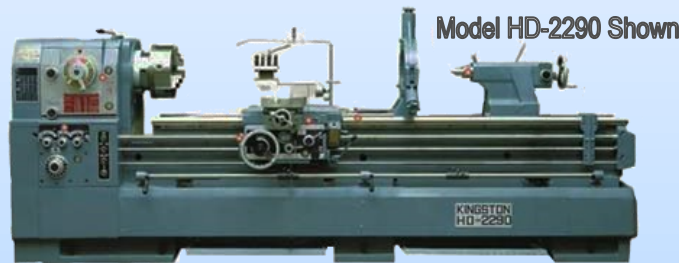

Model HP-3000 Shown

14-1/2" Spindle Bore

Flat Bed CNC Lathes

Many Other Models Available

Model HD-2290 Shown

Model LD Shown

Up to 50" Swing & 16" Spindle Bore

Model KMT 3-V Shown
