

Climate Control and Building Automation Systems

Our company, which started its facility on 2003, signed on many projects until now on domestic and abroad about Building Automation Systems with its expert staff.

As a result of the new construction in the company on 2008, Ges Teknik continues its activities about technical equipment sale, OEM solutions and technical support oriented to heating, cooling, ventilation, installation, automatic control and building automation systems.

Our quality-assured products

Some brands are not known by end users, they are used for years as system components by Heating, Cooling, Ventilation (HVAC) and Building Management Systems (BMS) Sectors' leading manufacturers.

Our broad product portfolio,

composed of products, which have technical specifications and costs that fulfills the different expectations of different types of residences and facilities, and meets both low first investment expected needs and advanced control system needs.

Our agencies;

Our franchises;

Because most of our products comply with more than one different system both our company and product supplier customers work with less stock types.

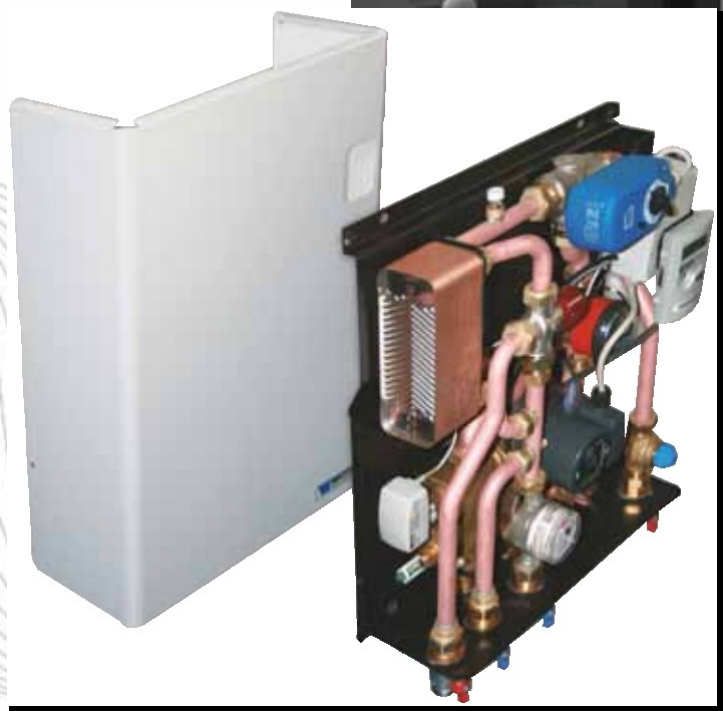

We programme control scenarios previously, obtain more reliable results with products of which tests are made at the production phase and shorten duration of field work.

Cost Factor,

We are providing significant contribution to our customers' first capital and operating costs due to its being competitive with respect of cost although the technical specifications and quality of our portfolio's products are high.

RESIDENTIAL COMFORT PRODUCTS

We are providing comfort by controlling your energy with Hot Water Preparation and Share Measurement Systems, Heat Control Systems and ancillary equipments for residences...

RESIDENTIAL COMFORT PRODUCTS

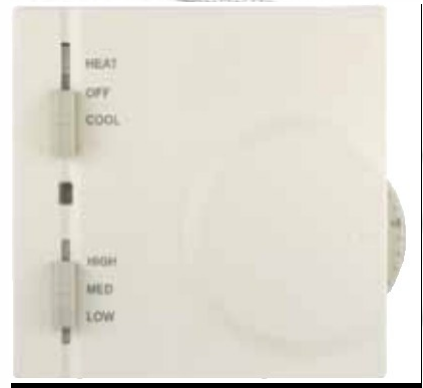

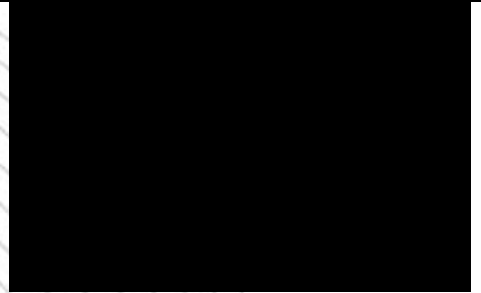

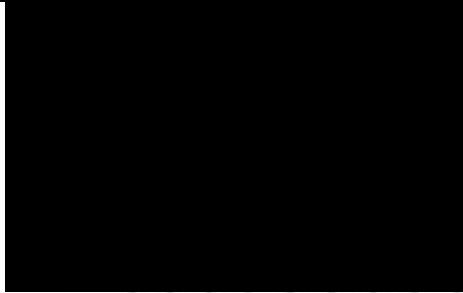

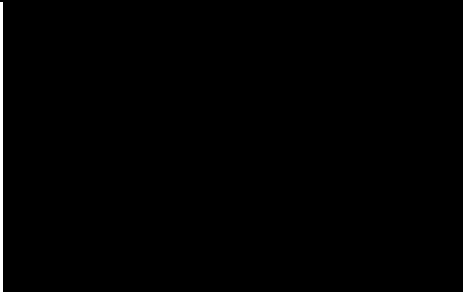

FAN COIL CONTROLLERS

Chic, modern and economic solutions for Fan Coil systems...

FAN COIL CONTROLLERS

FAN COIL VALVE and MOTORS

Wide control range at fan coil units with On/Off, Floating, Proportional motor and combined balancing valve options...

FANCOIL VALVE and MOTORS

AIR CONDITIONER-ROOFTOP-WSHP CONTROLLERS

Compact controllers oriented to DX type air conditioners...

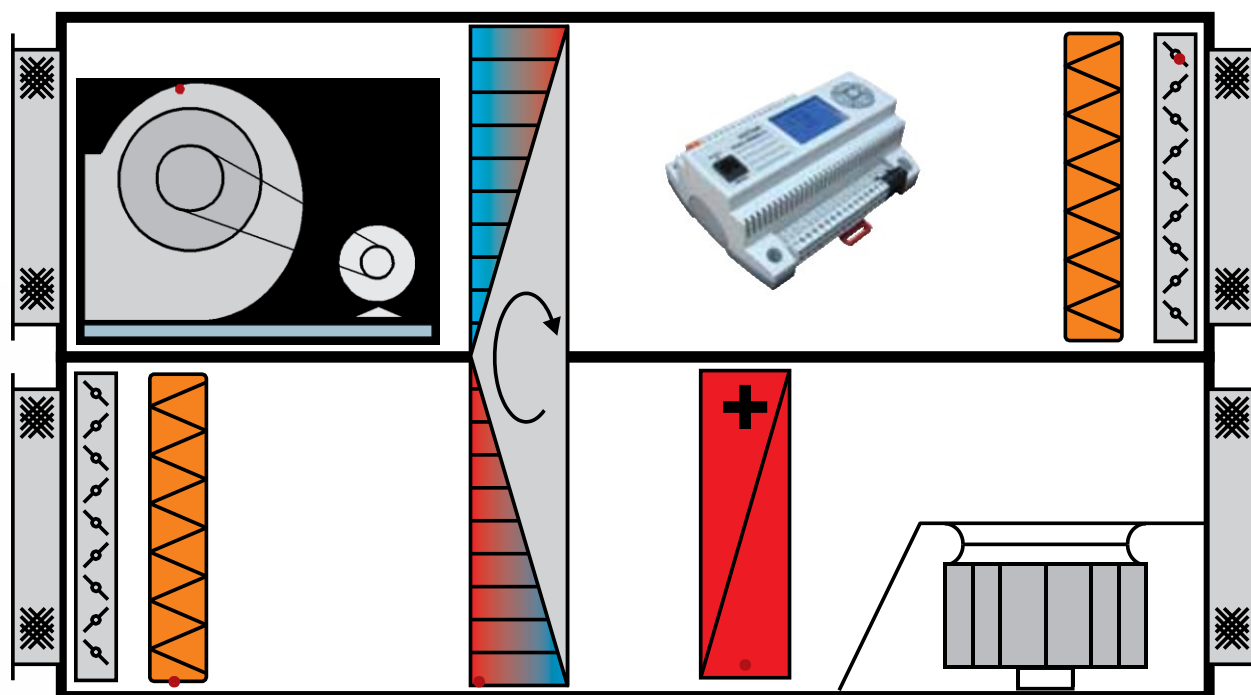

AIR CONDITIONER-ROOFTOP-WSHP CONTROLLERS

CONTROL PANELS

Precise measurement, correct control...

CONTROL PANELS

BMS COMPLIANT CONTROL PANELS

FCU, WSHP, ROOFTOP, VAV controllers compliant with Modbus, BacNET and LONWORKS open communication protocols for BMS systems...

BMS COMPLIANT CONTROL PANELS

SENSORS

Pressure, Speed and Flow Rate sensible elements for heating, cooling and ventilation systems...

SENSORS

SENSORS

Sensitive Heat, Relative Humidity, CO, CO₂, Air Quality, Condensation, Light and Movement sensible elements...

SENSORS

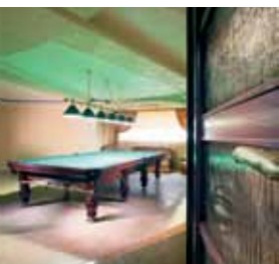

FREQUENCY INVERTER

We are providing you motor speed control solutions that you seek at ABB drivers, industry and HVAC applications, OEM sector with their reliabilities, easy usages, flexible working conditions and long operating lives...

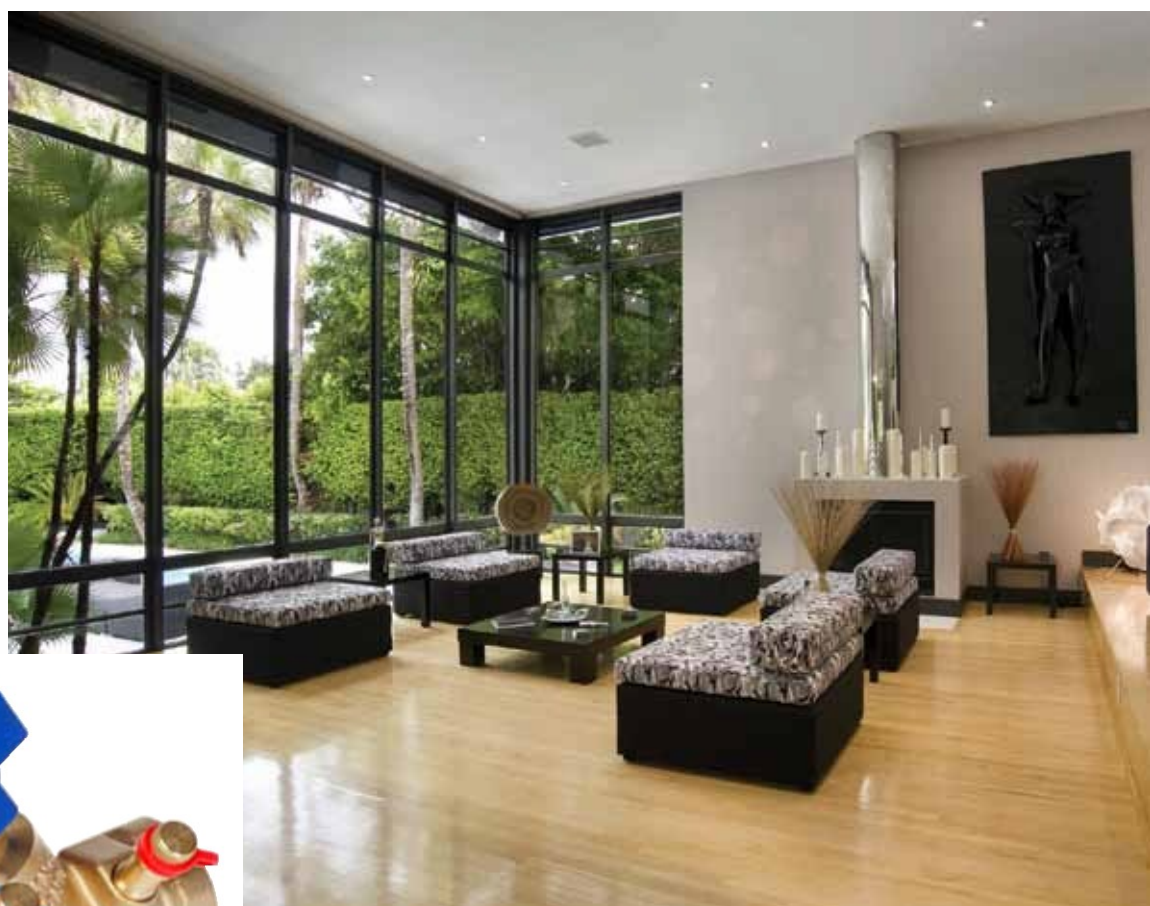

FREQUENCY INVERTER

BALANCE VALVES

Exact solution for balance problems on your installation...

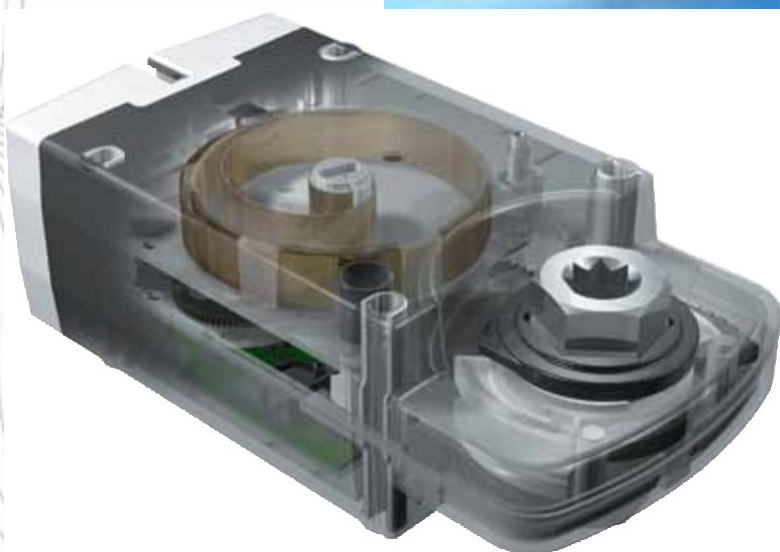

BALANCE VALVES

DAMPER MOTORS

Powerful servomotors until 40Nm with On/Off,
Waterproof, Proportional motors...

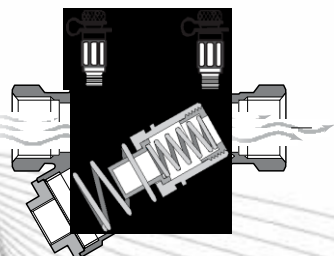

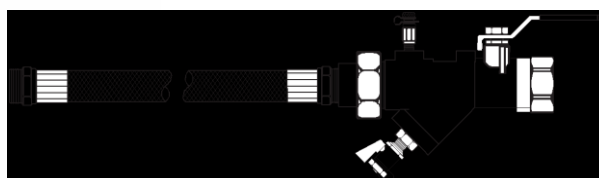

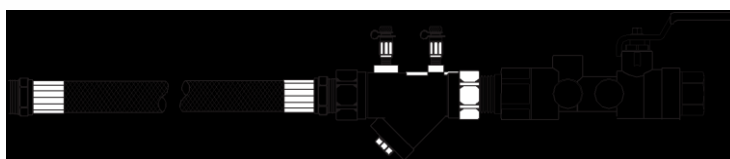

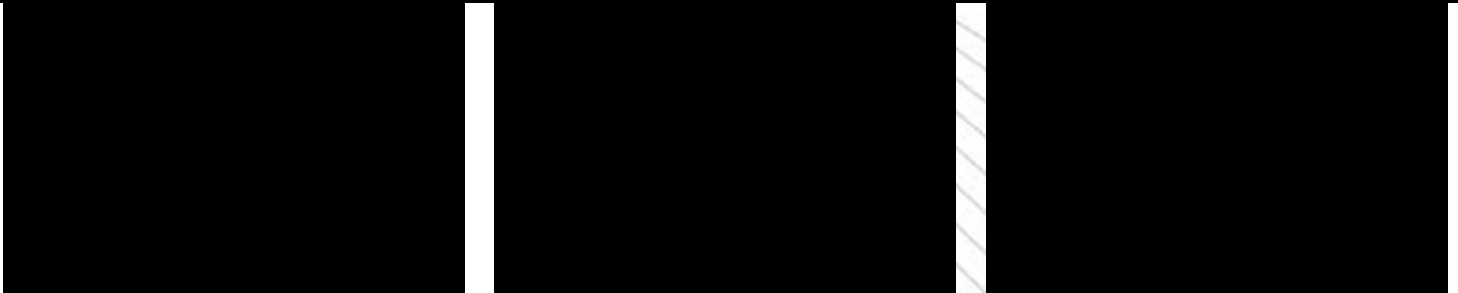

DAMPER MOTORS

OEM & BMS

We provide support to the solutions of your systems about mechanical manufacturing and software with our expert staff...
