

Specializing in Custom ASME Code Plate Rolling and Welding

SPECIALIZING IN CUSTOM PLATE ROLLING AND WELDING.

What makes Wagner Plate Works the premier custom plate rolling and welding company in the industry? It's simple. We have the largest and most complete line of plate vessel bending equipment in the world, so we can easily handle any custom job. No matter how big. No matter how fast. Plus people dedicated to customer service and the pursuit of perfection. It's what our customers have come to expect from Wagner. More importantly, it's what they'll always get.

STATE-OF-THE-ART PEOPLE.

Great equipment means nothing without great people. People who believe in doing things right the first time. It begins with experience. Years of specialized training, not only to work with the most intricate mathematical calculations, but to operate the equipment with absolute precision. Then we focus on what we do best—setting the industry standard for custom plate rolling and welding.

STATE-OF-THE-ART EQUIPMENT.

Plate Rolling and Welding At Wagner, our advanced equipment allows us to roll wall thicknesses up to 11-3/4" and up to 15' in length. With a .9999% tolerance and a five-inch thick weld that blends like the original plate. What's more, our welds not only exceed the requirements of ASME, but they set the standard for the entire industry, and our completed vessels are tested by independent sources to guarantee you get a superior product time after time.

Steel Sourcing Our size and reputation also gives us the unique ability to buy quality steel at the most cost-effective prices. That way you know you're not only getting a perfectly constructed product, but the highest quality product too.
