

CL200

Pre cut plastic strapping into desired lengths and unlimited quantities.

Sweed's cut-to-length Model CL200 plastic strap dispenser is designed to increase strap cutting efficiency and worker safety. By automating the strap cutting process, workers receive accurately cut pieces of strap, and material cost is reduced by eliminating waste. The CL200 also allows companies to eliminate repetitive cutting operations and reduce the possibility of lacerations and repetitive strain injuries.

The CL200 strap dispenser accommodates standard size plastic strapping spools (16" x 6") and can be customized to fit virtually any spool size. It features a user-friendly programmable logic controller (PLC); simply enter the length of the cut (in English units) and the quantity of straps desired into the keypad. The dispenser does the rest.

Sweed's cut to length Model CL200 strap dispenser is simple to maintain and designed for years of industrial use.

ONE COMPLETE PACKAGE.

MATERIAL REFERENCE

All sizes of PET/Poly Strapping up to 3/4" x .050"

PERFORMANCE DATA

- Electric Motor Power 1/6 HP
- Air Consumption 4 cfm/80 psi
- Outfeed Speed 41 fpm
- Cut Length User Programmable
- Minimum Cut Length 6"
- Maximum Cut Length 1000"
- Minimum Batch Setting 1
- Maximum Batch Setting 1000

STANDARD ELECTRICAL OPTIONS

- 1-Phase - 110 volt - 60 Hz - 2.1 amps

The Model CL200 (1-phase 110 volt) is standard with an 6 foot 15 amp power supply cord and molded plug. Voltages other than the standard above, are subject to a rewind charge.

HOW IT WORKS

Load spool with PET/Poly strapping. Prefeed the strapping tag end into CL200 cutter head. User programs length and quantity of required product. Machine turns off automatically at the end of the batch run.

FEATURES

- Continuous Speed
- Bi-Directional cutting design
- Accurate cut lengths to + or - 1/4"
- Auto shut-off at batch end
- Assembled in Gold Hill, Oregon
- Full one year warranty
- Non-jamming design
- Banding spool holder with adjustable tension control
- Two-wheeled dolly support stand for easy maneuvering
