

威士精密工具(上海)有限公司
WS PRECISION TOOLS (SHANGHAI) CO., LTD.

Basic information of the company

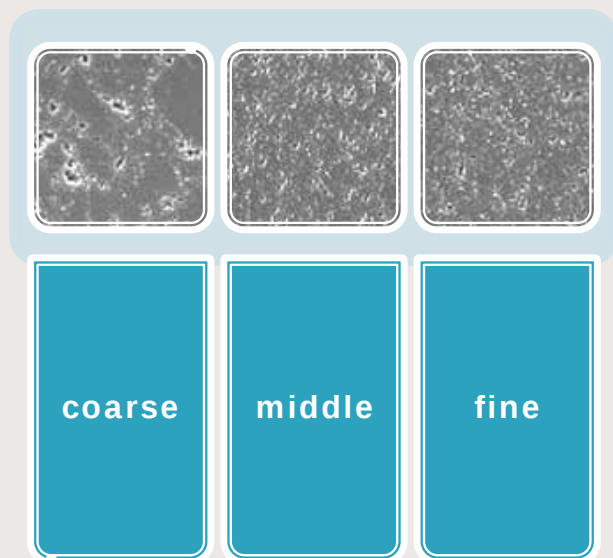

-  **WSS was established in November 2003**
-  **Professional manufacturer of PCD, CBN and ND Cutting Tools**
-  **The production of all types of ISO & Special**
-  **The optimal Before- and After-sales services**

Raw materials from GE und Element Six

PCD

CBN

Our facilities

EWAG CNC

VOLLMER QWD760 CNC

Our facilities

Our facilities

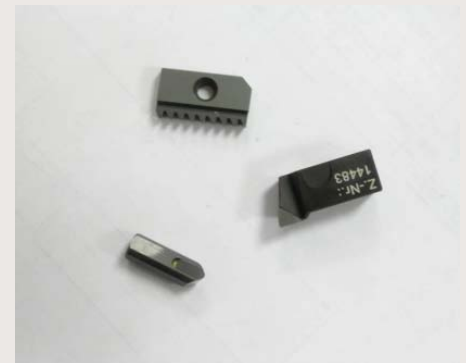

Our team

Our products

PCD / CBN insert (ISO & Special)

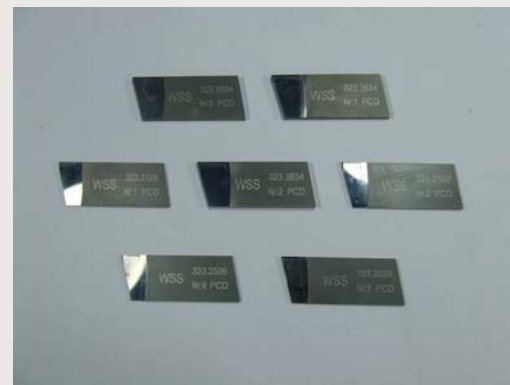

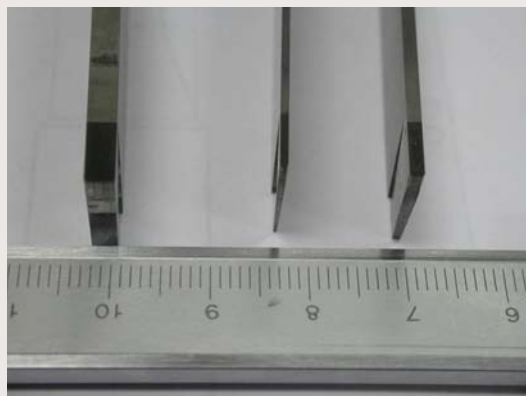

Special cutting tools

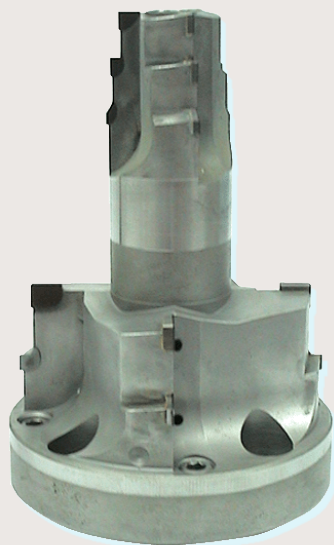

Groove tools

We are the one and only enterprise can reach the requirement of MAHLE™ 、Kolbenschmidt™ in China.

PCD Combination Step Tools

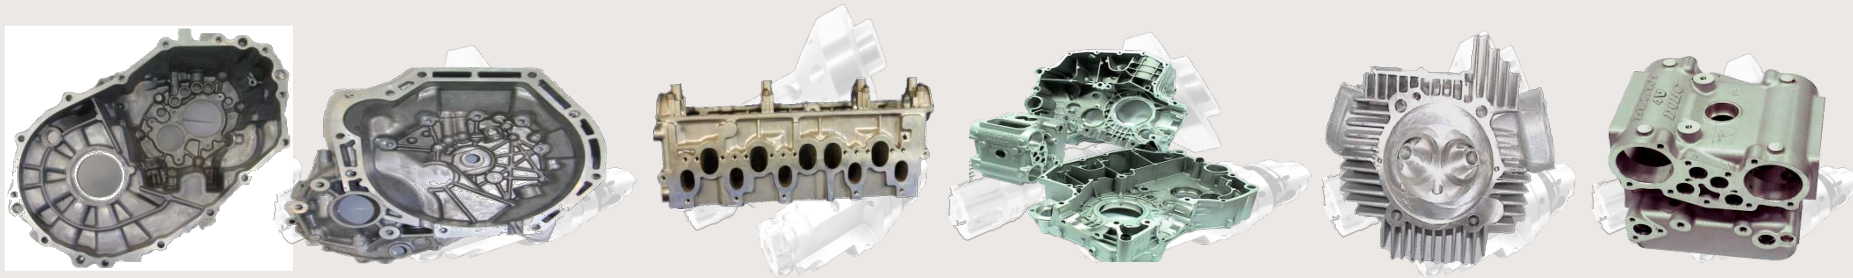

Products introduction

The use of PCD tools

PCD can be used in producing wearable part on machine and measure set and cutting any nonferrous metal

E.g. Aluminium, Carbide, Plastic, Ceramic, etc.

PCD tools is widely used in the production of Engine, Piston and other accessory, Transmission gear, Cylinder block and cover et.

The character of PCD tools

High efficiency($V_c=1000-3000$ m/min). Good roughness ($R_a=0.4-1.6$)

The use of CBN tools

CBN is suitable for cutting Fe metal which hardness between HRC45° and HRC 70°.

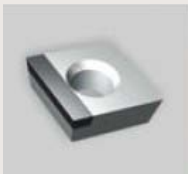

Eg. Martensite, Hard Steel, Cast iron, Stainless steel, Pearlite cast iron, Ni alloy, Co alloy, etc.

CBN tools are widely used in the production of Brake System, Cast iron Box, Crankcase, etc.

Cylinder body & Cylinder head machining tools

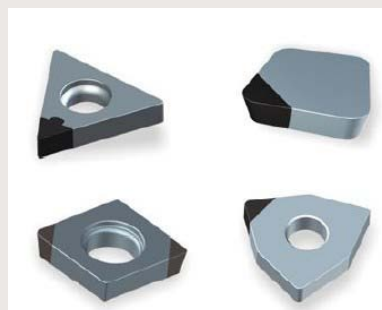

Piston & Connecting rod cutting tools

Roll and brake machining tool

Automobile valve body, nave machining tools

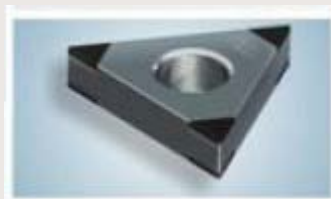

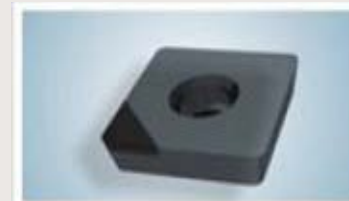

The main parts of automobile value for machining are head face and hole.

Machining head face should promise precision and roughness, while machining hole should keep concentricity and roughness. So adopt PCD / PCBN disk milling cutter and step reamer can solve these very easily.

The cutter for machining air condition compressor part

Visual Identity System

WSS 威士上海

TUV 认证证书

领先世界的刀具

- 复合成型刀具
- 用于一次性加工
- 各种机械零部件

专业·精确·及时

- 各种非标刀具和非标刀片
- 现代化的生产设备保证了刀具极高的精度

- 高精度槽刀
- 用于活套槽的加工
