

25 th. Anniversary

TECMU.MC <1985 ÷ 2010>

The **TECMU.MC** srl operates in the Services Mechanical-Electronic applied to machine tools since 1985. The activity began the experience of a group of technicians who, proud of their professionalism' and encouraged by the urgent request from the Customer users, placed at the disposal of the latter all their know-how acquired in the previous and his many years working in what was, without doubt, the "hotbed" of the Polo Mechatronic Italian, the

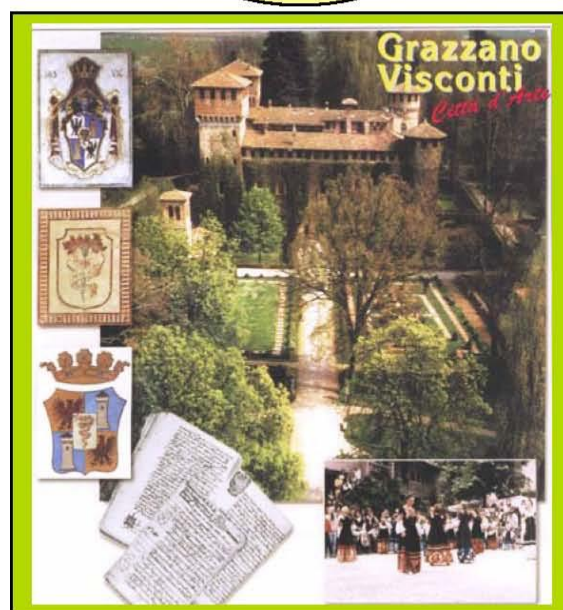

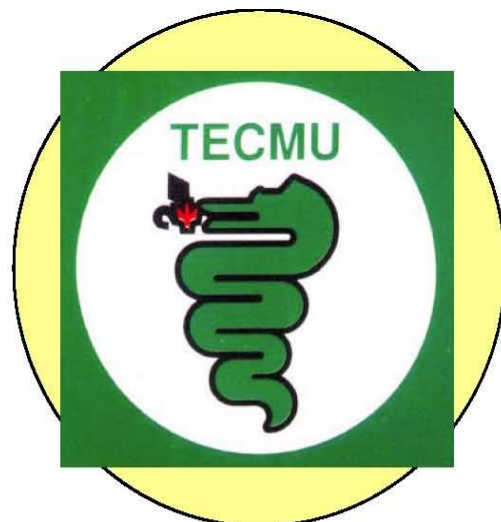

SECMU S.p.A. of Ponte dell'Olio.

The importance of the machine tool market and commitment in the execution of their work, certainly gave a decisive hand to launch **TECMU.MC**

To meet the increasing demands for revision and transformation of traditional machines, and automatization of special machines, it was decided by the members to expand its logistics units' production, bringing it from 600 meters / q. Starting at about 1300 square meters.

It took a few years, during which **TECMU.MC** had the opportunity, again through their work, to be appreciated in the national and international market for the quality 'of services offered and the reliability' in the time of the work performed; for to ensure that the space then available results still insufficient.

During all these years **TECMU.MC** has established a high level of cooperation with the manufacturers of the machines reviewed, and decided to give more development to their office design Mechanics and Electronics for the search for new solutions applicable to the machines, with the aim of eliminating the problems encountered. The experience pushed then the members of **TECMU.MC** to make some new prototypes of Work Centers and Boring to Mast Mobile.

TECMU.MC srl – Via Artigiani , 15 – 29020 Vigolzone (PC) – P.I. 00953220332 – Cap.Soc.i.v. Euro 90.000,00

OBJECTIVES ACHIEVED

The 1st objective was reached in the construction of two centers: "TMC 500" and "TMC 400", medium-small, cubic capacity of the working range: about 500 mm.

The 2nd was the realization of milling Mast Mobile Transverse medium to large machining center "TEC 10" high configuration flexibility, oriented mainly to the complex workings of Mould but also be inserted in real production lines FMS.

The 3rd goal was marketing (after about two years of testing at customer users) of the milling machine Mobile Mast Ram Longitudinal and transverse sliding, "TEC TMLS" medium-large size, available in different versions and very suitable for machining of large molds and / or structures of light carpentry and / or heavy and cumbersome.

With determination, looking to the future, **TECMU.MC** realized at that time (1995) its new and more 'large production facility, over 3000 square meters in area Grazzano Visconti (PC), where he continued with increasing Commitment-Quality-Reliability their work by offering our clientele the

Service of Mechatronic:

- Special Machine Design - Construction - Review - Rebuilding a New - industrial automations - Planners Software - Machining Grinding - Assembly Groups - Testing - Certification - etc..

INTERNAL WORKING

The new production facility has been operating since 1997, the sister **TECMU.IE** which performs processing for / third of facilities for all major manufacturers of machines, with the following adjustments:

- Nr. 1 Tangential grinding table with 10,000 mm passage between columns 2800 mm, height 1800 mm cross, all managed and controlled by CNC;

and

- Nr. 1 Tangential grinding slightly reduced in size mm. 7000 x 1800.

The use of these adjustments also allows the **TECMU.MC** to cure the precision machining directly in coupling of the structural machines, machining indispensable on basic particulars.

MAIN ACTIVITIES.....

PRODUCTION

New equipment:

Small Work Centers

Boring with Ram

Milling Mast Mobile Cross

Longitudinal milling Mast Mobile

REVIEW / A NEW RECONSTRUCTION

Mechanics and electronics of any type and brand of machine tool

Traditional machines in machining centers and / or Islands of production.

PLUMBING AND ELECTRICAL SPECIAL

Hydraulic power units, heat exchangers, Electric Generators, Power Plants, Paintings Automation, Distribution, Wire Special Interventions Service Mechanical and Electrical / Electronics

SPECIAL APPLICATIONS

- On any kind of machine tool exists and / or design of special machines

AUTOMATIZATION

- Using PLC, CNC, Islands of production, FMS, Production lines, special machines

TECHNICAL ASSISTANCE

- Each type of machine tool is in our office and that of the customer.

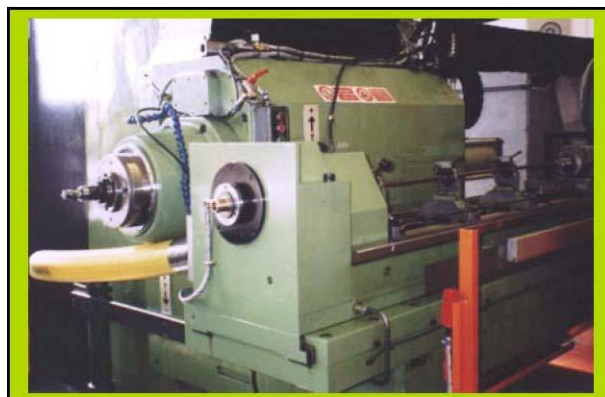

WAREHOUSE

- Equipped with all the electrical and mechanical parts of machine tools overhauled and made from scratch.

MACHINES TOOLS REFITTED AND BILD SAME TO NEW

- TECMU.MC in all these years has rebuilt to new models of the following brands of machine tools (Milling - Turning - Machining centers in general):

ACME	MCM
BERARDI	MORANDO
BRAGONZI	NORMA
BURKHART WEBER	OMBA
CINCINNATI	PAMA
CARNAGHI	PARPAS
COMEV	PONTIGGIA
DE TOMASI	RAMBAUDI
FAVRETTO	SACHMAN
FPT	SAFOP
GRAZIANO	SAN ROCCO
HINWANG	SECMU
INDUMA	SHARMAN
INVEMA	SKODA
INNSE	SIGMA
KITAMURA	TMA
MANDELLI	UTITA
MAZAK	WALDRICH

TECMU.MC is able to provide machines Revised and / or Rebuild Earnings (with 12 Months Warranty). Automate and accompanied by one of the following numerical controls (customer's choice):

- SELCA
- HEIDENHAIN
- CONTROL TECHNIQUES
- ECS
- D. ELECTRON
- AB OSAI
- SIEMENS
- BOSCH
- FANUC
- FIDIA
- NUM
- FAGOR
- ANILAM
- LIKA

The service

“TECHNICAL ASSISTANCE TECMU.MC”

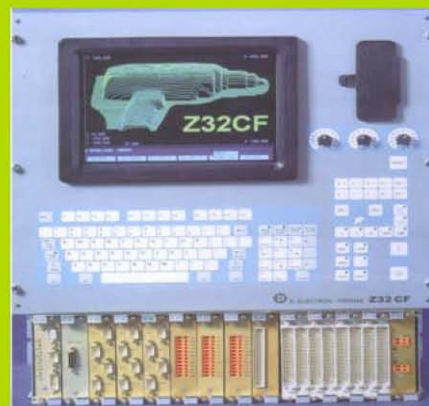

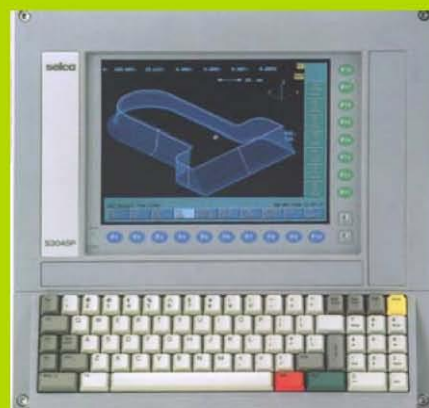

is able to provide assistance on any type of machine tool or special system in a maximum of:

- 24 hours in the Northern Italy
- 36 hours in the Italy (islands excluded) .
- 48 hours in European States .
- 72 hours in Extra European States (VISA permitted)

TECMU.MC has active h.24/24 our service of

HELP LINE To this number :

- Office (8.00-18.00) : 0039 0523 879246 (tel&fax)
- Mobile Electronic : ++39 335 7235700
