

# EDGE PRO

## Portable Edging Machine

The **Edge Pro** portable edging system is a milling machine, that glides over a flat surface producing a perfect edge detail. A slab guide provides accurate tracking of straight edges and also serves as a tool guard and coolant diversion. The slab guide may be removed in order to follow curves

using the bearing attached to the router bit. The Edge Pro is powered by a standard variable speed router requiring only 110 v electricity. No special transformer or 220 power is needed to operate the system, making the Edge Pro truly "portable" and jobsite friendly.

- ◆ PERFECT STRAIGHT OR CURVED EDGES
- ◆ PRECISION VERTICAL ADJUSTMENTS
- ◆ INDUSTRY STANDARD DIAMOND ROUTER BITS
- ◆ HEAVY DUTY ROLLER SYSTEM FOR EASY MOTION
- ◆ RELIABLE AND INEXPENSIVE

Power 1.725 Kw  
Voltage 115 v 60 Hz
