Done Rite S.S. provides its customer base piece of mind in knowing that their equipment is literally....

If your not satisfied... neither are we
All of our work is 100% guaranteed

DRY ICE BLASTING

Before & After

The environmental choice for **INDUSTRIAL STRENGTH CLEANING**

--Dry ice cleaning uses no chemicals, produces no secondary waste, leaves no residue and is more effective than any other method of cleaning available and being used today

--Dry ice is a approved cleaning medium by the EPA, USDA, FDA, AIB & GFSI, it is non-toxic, non-hazardous and inhibits mold & bacteria growth

--Dry ice cleaning can reduce downtime from days to hours, cleaning in place, with little to no dis/re assembly required

--Dry ice cleaning does not damage or etch surfaces being cleaned like other methods do

--Dry ice cleanings effectiveness and versatility are unmatched on delicate circuit boards to aggressive paint removal

 In addition to it's seemingly endless benefits for cleaning, it is also important to know that dry ice is obtained as a byproduct of other industrial processes, i.e. it is made from reclaimed CO2. It does not add new CO2 to the atmosphere and therefore does not contribute to greenhouse gasses
