

Phoenix Laser Solutions

A Premier Laser Systems Dealer

We are a Pennsylvania based company that proudly sells and services Alpha Laser Systems throughout North America in the Aerospace & Defense, Automotive, Energy, Medical, and the Tool & Die industries. Our cross-functional team represents over 100 years of experience. Our world-class equipment and our dedication to quality allow us to accommodate each customer's unique needs.

Phoenix Laser Solutions is the premier North American Dealer for *Alpha Laser GmbH*, a German company that creates the most versatile and powerful pulsed lasers on the market. Ranging from the VL50 (made for jewelry and dentistry) to the AL500 (the strongest Nd:YAG laser commercially sold), these machines feature a simple and intuitive user interface. *Alpha Laser* integrates flexible architecture and user-centric ergonomics in a machine that easily accommodates single piece or high volume production.

Alpha Laser's latest offering, the **AL-ROCK**, introduces continuous output lasers for high-demand applications: laser hardening, laser cladding, and deep penetration welding.

We provide parts, sales, and service for all *Alpha Laser* systems in the US and Canada, along with tailored training and support for your specific needs.

Remember to use **Phoenix Laser Solutions** for your laser welder needs. Visit our website for more details!
