Our history

Our history

Founded in 2011 by a professional team with experience in technology sales.

2011: starts the partnership with Nikon Metrology

2012: starts the collaboration with Mod.En

2013: starts the collaboration with Vici Vision and Makino

2014: starts the collaboration with API Sensor

2014: starts the collaboration with ASI DATAMYTE

2015: starts the collaboration with Speroni

2015: starts the collaboration with LTB LASERTECHNIK

2015: starts the collaboration with Metkon

2015: starts the collaboration with Nachi

2015: starts the collaboration with Lasit

ISO 9001
accreditation

Our vision

Our vision

We help individuals and organizations to work more effectively and efficiently to create greater and precise products in the domain of work, for the benefit of all concerned.

As one of the best local provider for quality equipment's and services, we are conscious of our role in front of our customers.

We wants to be seen as our customers **Productivity Partner**.

Our strategy and strategic priorities

Our strategy and strategic priorities

Quality. The best quality services!

Being a company that is among the best in Romania in its business, being defined as a reliable company by its customers, that provides high quality services, offering high technology solutions.

Our rules:

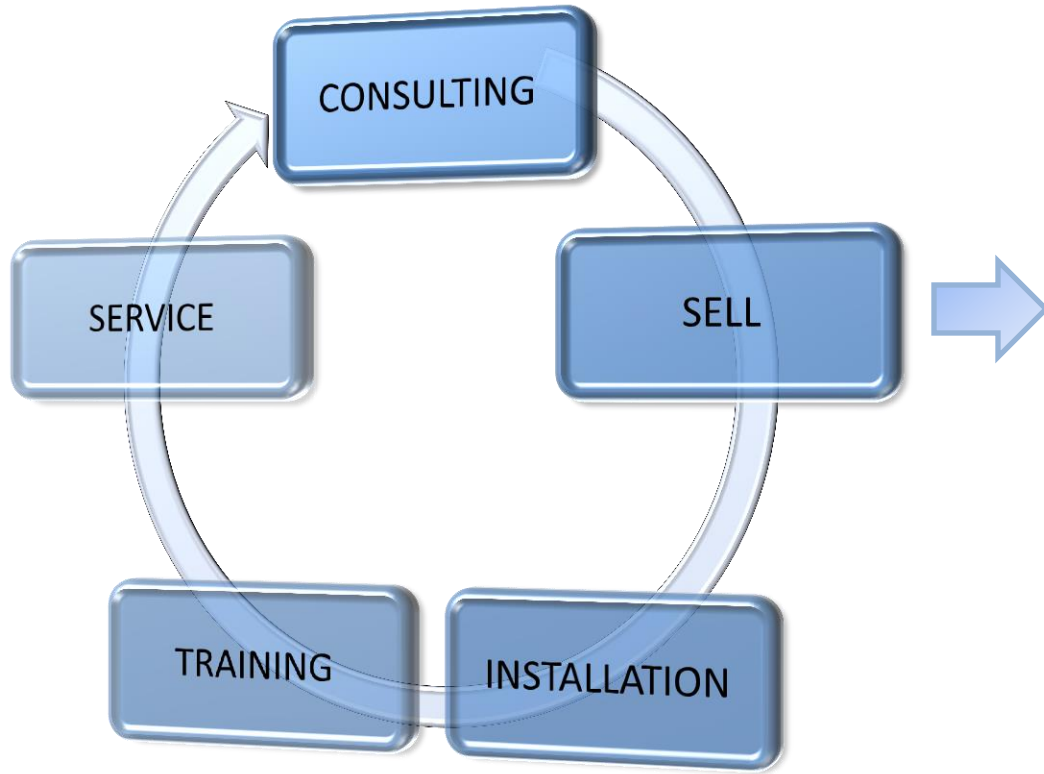

Respect for our Customers rights and time

Representing our producers products in the best possible way

Satisfying our employees and improving their moral values

Our services

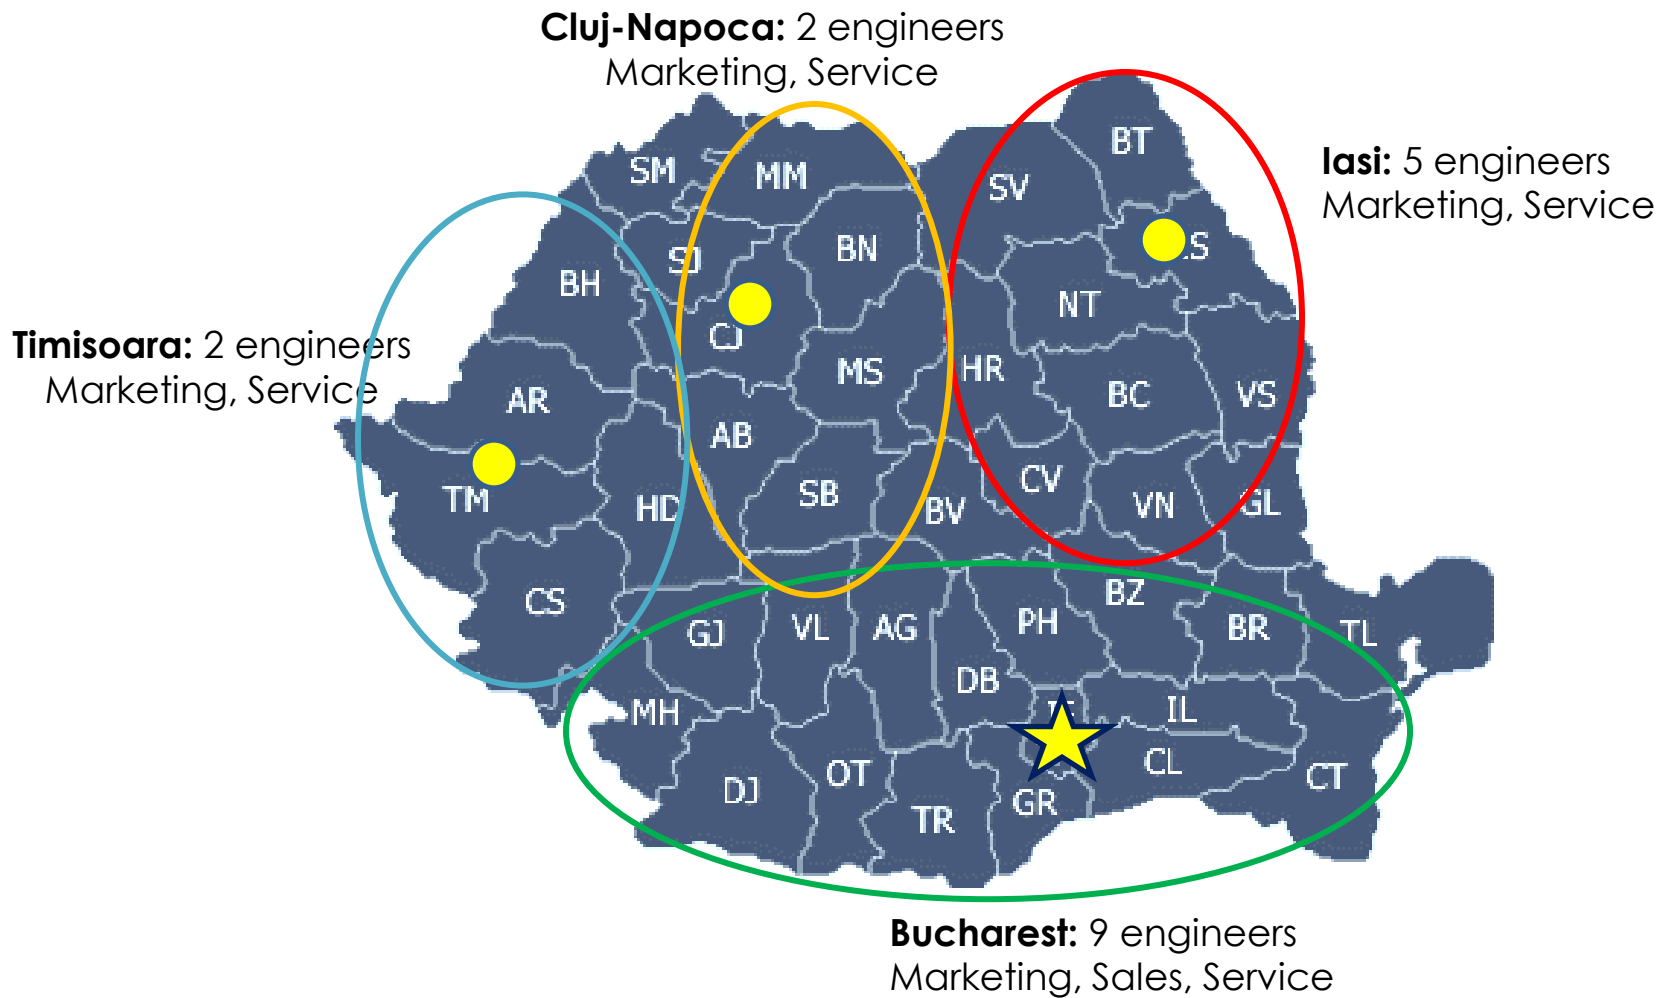

Our services

We maintain a constant dialogue with our clients to create more and better opportunities increasing their competitiveness.

Our products

Our products

TOP Metrology SRL is representing in Romania companies as:

NIKON METROLOGY

MAKINO

API SENSOR

VICI VISION

ASIDATAMYTE

SPERONI

METKON

LTB LASERTECHNIK

MOD.EN

NACHI

LASIT

NIKON METROLOGY

Today **Nikon** is a world-renowned brand, firmly established as a market leader in optical instrumentation and the only microscope company to manufacture its own glass, ensuring the very finest quality assurance throughout production. With over 90 years expertise in the field, Nikon has always been at the forefront of optical and technological innovation, promoting creativity and trustworthiness as part of the company's global mission statement.

Nikon Metrology products:

- Coordinate Measuring Machines
- Microscope Systems, Video and Multi-Sensor
- Laser scanning
- Portable Measuring
- X-ray and CT Inspection
- Video & Microscope Measuring
- Large Volume Applications

At **Makino**, precision is a mindset. Our technology is precise. We listen precisely, work precisely and develop precise solutions. The results are revealed in the long-lasting quality, reliability and stability of our products. The need for components with tolerances measured in microns, or even nanometres, is steadily increasing: parts in digital cameras, mini-motors or microvalves in automotive brake systems. Makino has the technologies needed for such ultraprecision machining.

Makino products:

- Horizontal Machining Centres (HMC)
- Vertical Machining Centres (VMC)
- Sinker (SEDM)
- Wire EDM
- Grinding

API SENSOR

For over 25 years **Automated Precision, Inc. (API)** has been creating advanced metrology solutions for the world's leading companies. API offers a unique mix of innovative engineering capability, superior product quality, and outstanding customer service to improve your business. The API team can significantly improve the quality of your products and processes. Not only will our experts enhance your ability to perform inspections, but also enhance the capability of the machines producing your parts. The API Team will show you new ways of increasing productivity, reducing scrap, enhancing machine accuracy, and improving inspection efficiency.

API SENSOR products:

- Laser Trackers and Accessories
- I-360™ Hand Held Scanning and Probing
- Targeting Accessories
- Machine Tool Calibration
- CMM Products
- 3D Laser Scanners

VICI Vision

The development, focused on customer's satisfaction, allowed to gain a remarkable experience in producing special solutions, making of **Vici & C** the ideal partner for avant-garde companies that first feel the need to satisfy innovative requirements of the market. The group designs and manufactures industrial automation solutions for mechanical, wood and ceramic industrial fields. The acquisition of the brand **Vici Vision**, an expert in the field, enable the group to increase its range of products by designing and manufacturing optical measuring machines, quality control machines with vision system and advanced robot-guide systems.

Vici Vision products:

- optical measuring machines
- assembling machines and lines
- test and inspection benches
- toolmachines interlocking
- electric panels

ASI DATAMYTE

ASIDATAMYTE

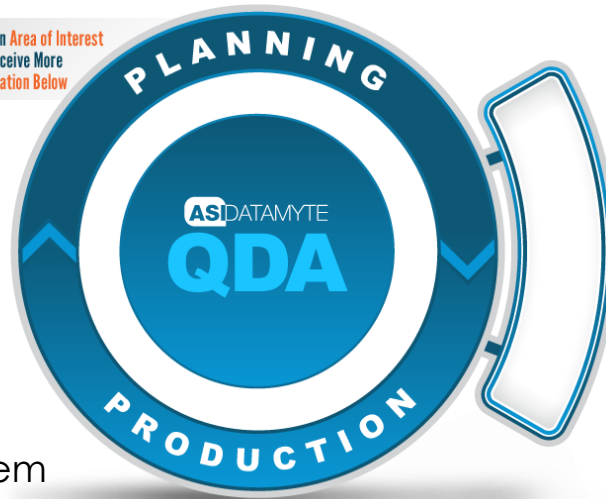

THE GLOBAL STANDARD FOR ENTERPRISE QUALITY SOLUTIONS™

ASI DATAMYTE is the leader in providing solutions for Quality in Assembly, Manufacturing and Laboratory operations around the globe. With more than 40 years experience, a global presence and world class solutions, they provides innovative Quality Solutions like integrated solutions for managing quality, quality improvement and reducing the cost of quality.

Asi Datamyte products:

- QDA software
- Laser Gauge
- 600 Data Collector
- LightStar Torque Audit System
- Gage Interfaces

Since 1963, **Speroni** offers a vast line of products and solutions in the fields of Tool Preset, Measurement and Management, and Quality Inspection of the Manufacturing Process. We work in close relationship with our customers all over the world in order to understand their needs and offer them the best technical and economical solutions to be made using the most advanced technologies so that more and more companies around the world can benefit from the use of our systems.

Speroni tool presetters:

- STP Magis
- STP Futura
- STP Shrink

Metkon products are used in research laboratories, in quality control, on production lines and in education, in large government installations, automotive companies and sub suppliers, small independent laboratories and other industries. Materials scientists, designers, engineers and QC managers use METKON products to evaluate the mechanical properties of materials, components and structures.

Metkon products:

- Cutting
- Mounting
- Grinding & Polishing
- Sample Preparation

LTB Lasertechnik Berlin GmbH is an innovative developer and manufacturer of short-pulse lasers in the whole optical spectral range, and of different spectrometers and laser-based measuring technique, marketing its products world-wide. LTB's mission is to anticipate needs within the widest array of applications and incorporate them into LTB product development. LTB products are characterised by a high innovation level and influence the global device standard. Apart from the high quality and know-how that our customers have come to expect and rely on, our products are economical, practical, mobile, and efficient.

LTB products:

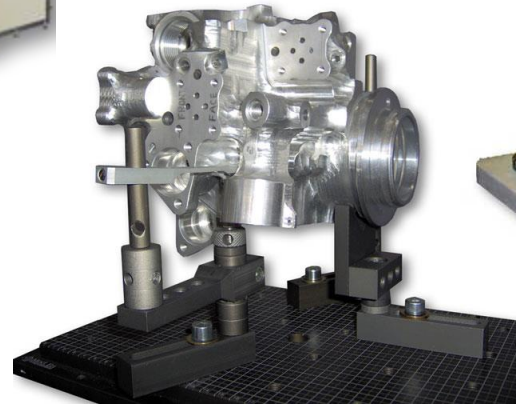

- Lasers
- Spectrometers
- Analyzer
- Card counters

Mod.En has a wide products range all designed to help obtain the maximum productivity profitability from measuring machines. As well as established partnerships with major Italian Companies and their suppliers, like Alenia Aeronautics, Lamborghini, Fiat Group Automobiles, Italdesign Giugiaro, Magneti Marelli, Oerlikon Graziano, Piaggio Aero Industries, we have acquired major International Group Customers including Aston Martin, BMW, Chrysler, Daewoo, Jaguar, McLaren, Rolls Royce, Tata, Toyota, Vaz, Volkswagen.

Mod.En products:

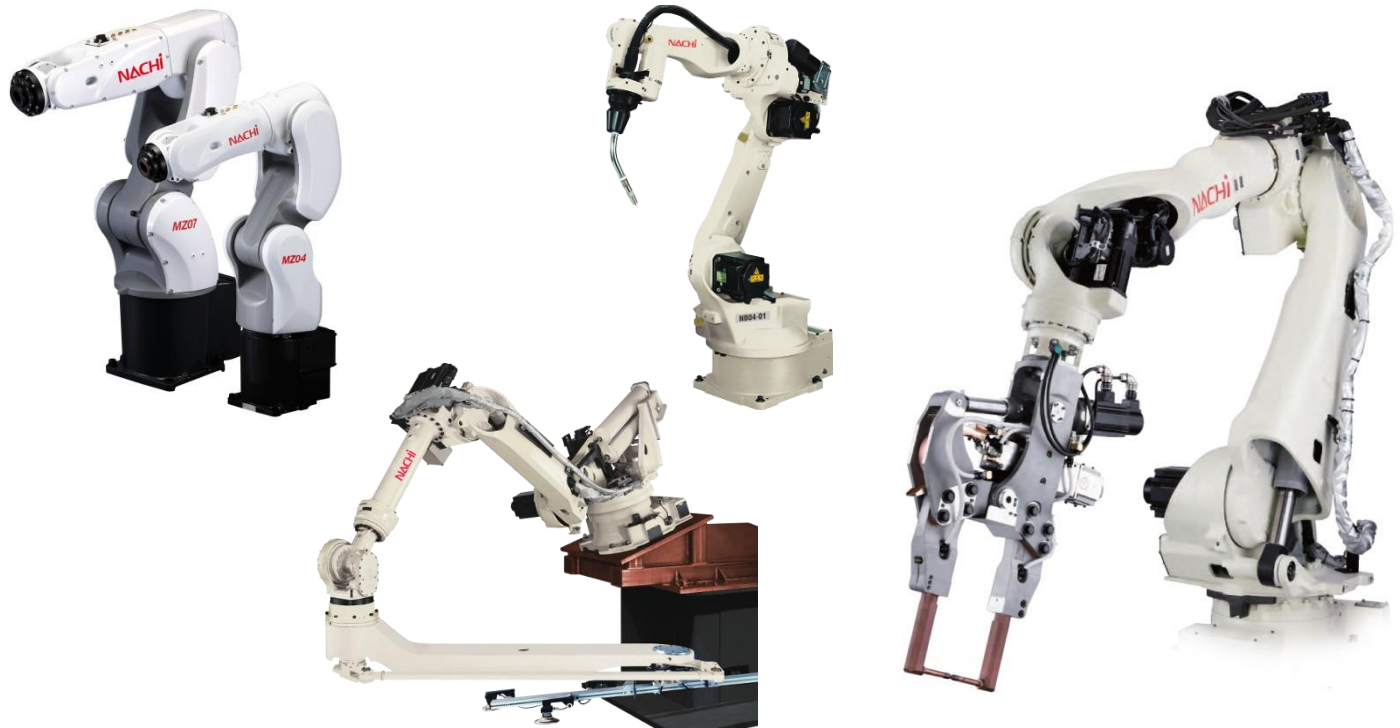

- CMM Fixtures
- Gages
- CMM loading/unloading system
- CMM Cells

Since it was found in 1967, **NACHI EUROPE GmbH** has made a decisive mark on industry and in particular medium sized European businesses, over forty years. Through brave, carefully developed technical innovations. With a closely knit network, NACHI EUROPE GmbH is in an excellent position to develop your success in the European market. As a capable, wide ranging manufacturer and developer of innovative mechanical, electronic and robotic technologies NACHI will help you to expand and develop your business potential in Europe.

NACHI products:

- Clean series
- Heavy series
- Light series
- Middle class series
- Press series

Lasit was founded in 1990. In the very beginning it was focused on the development and production of sub-assemblies to be used in laser industry, such as CO2 and Nd-Yag scanning units with dynamic focusing. In 1992 Lasit entered the laser market with the development of its own proprietary laser sources, electronics and software. Since that time Lasit has grown to become a global supplier of laser marking and engraving systems offering both standard equipment and customized solutions with a broad range of equipment and automation.

LASIT products:

- Standard laser machines
- Special laser machines
- Lasers for integration

**We are ready to be your
longtime business partner !**
