# Devine Machine Tools, LLC

Your source for Star Swiss Type Lathes and Seibu Wire EDM Machines in Texas and Oklahoma

Star and Seibu machine surfaces are hand scraped by skilled craftsmen to provide accuracy and stability. Fanuc controls provide the most advanced, reliable CNC controls on the market today.

## Quality Machines

Devine Machine Tools, LLC represents the leading providers of superior technology and unparalleled service to the machine tool industry. Star CNC is well known for its reputation of quality and the delivery of Swiss-type state-of-the-art Computer Numerically Controlled (CNC) technology. In 1972, Seibu invented the worlds first wire EDM machine. Quality manufacturing and precise controlled movements result in consistent part accuracy.

### Star Swiss Type Lathe Features

- Models from 3/8" to 1 1/2" bar capacity
- Fanuc controls on all models
- Eliminate ground stock with Rotary Magic Guide Bushing (option)
- Reduce idle time with Star's Motion Control System
- 2 year warranty on machine and control

### Seibu Wire EDM Features

- Fanuc 31i-WB controls on all models
- Start Hole Attachment can burn a start hole in minutes
- Core Stitch Function welds the cores in place so they do not fall into the machine
- EL Coating prevents cobalt depletion in carbide
- Thermal Adjust 24 feature corrects thermal displacement

## Support After the Sale

Devine Machine Tools, LLC can handle your application and service needs on Star Swiss type and Seibu Wire EDM machines.

- Experienced Technicians
- Program Training
