Founded in 2000, GILDE commits to the research and development of sheet metal machinery, pursuing the best quality and performance.

Now GILDE has already grown into one of the biggest manufacturers in the sheet metal processing equipment field. Our factory has a considerable scale -covers an area of 76,530 m2, with more than 300 employees, also owns an outstanding research and development department including 20 technicians and engineers.

From sole machine building at the beginning of marketing, selling, servicing and supporting different kinds of metalworking equipment, the number of our main products has multiplied. It includes NC/ CNC hydraulic press brake, NC/ **CNC hydraulic shearing machine**, Laser cutting machine, hydraulic press machine, all kinds power press and plate rolling machine, multi-function ironworker, plasma cutting and so on. Moreover, various tooling and spare parts are also supplied as clients' demands.

With more and more clients trusting on us, our products are sold well in more than 50 countries and regions all over the world. We are sparing no effort to create a win-win situation for customers, employees, and our company.

Innovation and Talent Reserve

As one of the biggest [press brake](#) & shearing machine manufacturers in China. We understand the importance of talent in the development of an enterprise.

Now, Gilde has more than 300 employees and 20 technicians and engineers, all of them have rich experience in manufacturer of sheet metal machine. What's more, We engage 3 Germany professional experts as permanent technicians in our factory with high salary to guide design, research and develop machine. which will improve our product power.

Technology innovation is the innovation strategy for enterprises to improve production's competence and get the advantages of competition. We have been sticking to innovation, own more than 260 patents of equipment manufacture industry.

We will invest more in talent and innovation and build a first-class enterprise.

We have 4 sets of large-sized floor-type milling& boring machine, one is 20m length, one is 16m length, the other two is 12m length; 4 sets of over 3 axis CNC machining center; 1 set of ultra-large type annealing furnace which is the only one in a local place.

High Level Processing Facilities

Annealing furnace

Comprehensive Consultation Service

GLDMA supports both machine and skill service. With drawing or sample, we can give you project suggestion for producing.

Continual Research & Innovation

Successively introduced technology from Taiwan and Germany, [GLDMA](http://www.gldma.com/) insists on technology research & innovation past, present and future.

Quality Assurance

GLDMA has a strict quality system and also obtains recognized certification, like CE, SGS, ISO certification.

Strong After-sale Service

With two year warranty, GLDMA after-sale service group will accompany you to maintain and keep the machine in the best performance.

GLDMA Main Products:

[Hydraulic Press Brake](#) : One of the most important and the main product from GLDMA.

Hydraulic Shearing Machine

Laser Cutting Machine

Rolling Machine

Hydraulic Presses

Fiber Laser Cutting Machine

QC12K-NC Hydraulic Swing Beam Shearing Machine-ESTUN E21S system

WC67K NC Hydraulic Plate Press Brake With E21 Controller

W11 series 3 rolls mechanical symmetrical rolling machine

WC67K CNC Hydraulic Sheet Metal Press Brake Bender Machine With DA41s System

QC11K-NC Hydraulic Guillotine Shearing Machine-E21S system

QC11K-CNC Hydraulic Guillotine Shearing Machine-DELEM DAC360 System

MB8 3+1 axis CNC Hydraulic Servo Press Brake Machine -DELEM DA52S

MB8 Automatic Sheet Metal Press Brake Bending Machine With DA56S System

YL78 Series Hydraulic Door Skin Press Machine

MB8 CNC 8+1 Axis Hydraulic Press Brake Machine With DA66T System

We will be updating more and more products at the official website, please go to the website and check more, or contact us directly by email or phone.
