Cost-saving Packaging

通过包装节约成本

We have a German customer in Shanghai, a manufacturer of production machinery for customers like Michelin, Continental, etc. They previously seek two separated companies to do the packaging and the logistics respectively.

The packaging company only cared about the safety of goods and did not pay much attention to the dimensions of the packages. So each time when a line for tire production machinery was exported, the logistics company would use 12×40'HQ to load all the machines.

When we were invited by this German customer to do packaging and logistics, we re-designed the packaging solutions to make all the packages to fit better into the containers and finally only 10×40'HQ is used. We not only saved on ocean freight, but also the total logistics charges from the shipper to the consignee which includes trucking charges, port charges, THC, etc.

我司在上海的一家德国客户，以生产汽车设备为主，该客户为米其林，大陆汽车等客户提供商品服务。这家客户以前使用两家公司分别安排货物的物流和包装服务。

包装公司仅仅关心货物的安全性，并不了解物流操作中所需的包装尺寸。因此，每次一台流水线设备在出口运输的时候，另一家物流公司需要安排12个40尺高柜来装运所有货物。

当我们为这家德国客户来安排包装和物流方案时，我们重新设计了包装尺寸使这批货物全部适用于集装箱尺寸，最终我们仅使用了10个40尺高柜。我们不仅节约了海运费，而且使得整个物流成本全体下降，包括卡车运输、港口地方费用等全部得到降低。因此，我们可以很负责的说，使用我们包装物流一体化，可以使您的成本降低。

高效 TIME-SAVING

These will reduce the logistical costs tremendously when a large volume of goods are being packed.

在设计环节，我们全方位地考量，确保包装适合集装箱和拖车的尺寸。优化过的包装设计在超大尺寸的货物包装中，可以节约可观的物流成本。

经济 COST-SAVING

Coordination work for packaging and dispatching of products are time-consuming. Topline Packaging provides packaging and delivery together, so that customers do not need to coordinate separately between the packagers and the logistics.
