

Topline
Express Logistics

Better Service, Better Solution

About TEL

TEL, a brand name of Topline Express Logistics, has been providing customers with its high quality services on a door-to-door basis. Since 1994, TEL develops from a general freight forwarding company to a total logistics service provider.

At TEL, we treasure the partnership with our customers by actively offering optimized packaging design and innovative logistics solutions, i.e., solutions not only tailored to the specific needs and expectations of each of our customers, but also aimed at generating a competitive edge and enhancing profitability for our customers.

TEL is a licensed NVOCC (Non-Vessel Operating Common Carrier) approved by the Ministry of Communications and also a Class A international freight forwarder approved by the Ministry of Commerce in China.

- Learn more at www.topac.cn

Heavy Lift and Project Logistics

Project logistics is like a work of art and full of innovations and challenges. After a series of work, we provide our client with the best solution including:

- Field survey and risk identification
- Planning the procedures and the stages of transit
- Implementation of plan including loading and unloading, lashing and securing, positioning of the heavy lift
- Monitoring the whole process
- Crisis management

Transport 98 ton presser frame from Germany to China

Discharge the frame and position it in the factory at Shanghai

Exhibit and Event Logistics

■ Exhibition, fair, meeting (with ATA Carnet)

Unlike general freight forwarding, the exhibit and event goods have higher demand of punctuality for pick-up and delivery. Exhibition hall, stadium and concert hall is not always available until its turn for your exhibition or entertainment. Besides, the location of trade fair or entertainment may have restrictions for traffic. But don't worry. Our professional team knows how to solve these problems. We know the documentation requirement for ATA Carnet and will pick-up and deliver your goods strictly according to the time schedule.

Sole sponsor and logistics service provider for the performance of Redcoat Marching Band in Shanghai in 2006.

Logistics service provider for Shanghai Conservatory of Music for its performance of Marriage of Figaro in 2015 and handled the stage properties from Italy and Japan to China and vice versa.

- ✓ Have a team of dedicated professionals to ensure the provision of high quality service and transmission of information precisely, promptly and completely.

reliable

- ✓ Have a pre-arranged cargo insurance coverage of RMB230 million per annum
- ✓ Complete packaging solutions for various industries to ensure the safety of cargo during transport
- ✓ Warehouse with 24 hours CCTV monitor system to ensure cargo security

innovative

- ✓ Total logistics solutions including tailor-made packaging solutions based on the cargo properties and transport conditions can reduce the cost and increase the efficiency in the supply chain.

CASE: Improving packaging lowers the cost

We have a German customer in Shanghai, a manufacturer of production machinery for customers like Michelin, Continental, etc. They previously seek two separated companies to do the packaging and the logistics respectively.

The packaging company only cared about the safety of goods and did not pay much attention to the dimensions of the packages. So each time when a line for tire production machinery was exported, the logistics company would use 12x40'HQ to load all the machines.

When we were invited by this German customer to do packaging and logistics, we re-designed the packaging solutions to make all the packages to fit better into the containers and finally only 10x40'HQ is used. We not only saved on ocean freight, but also the total logistics charges from the shipper to the consignee which includes trucking charges, port charges, THC, etc.

CASE: DG cargo air-transportation

Our company has accepted a large-sized medical equipment from Siemens. Its core part is filled with dangerous gas, almost all airlines refuse to accept this cargo.

Our company has designed the most applicable solution for customer. With our great efforts and coordination with many parties, we have successfully delivered the cargo to destination.

CASE: Used machinery import service into China

As the Chinese government has a tight control on the import of used machinery, the knowledge and experience in handling such machinery is very important.

Many importers are hesitating to buy used machinery because of that, but TEL can solve the problem by providing the full-set logistics services from documentation, organizing pre-shipping inspection, shipping, customs clearance, transport, positioning, etc.

CASE: Project logistics

Transport main body of automatic ceramic production line (pressing) from China to Turkey

6200 x 2350 x 2750 mm
88.221mt
40.07cbm

Transport equipments for nuclear power plant and steel mill

Discharge, transport and position the 126 ton presser frame
