The screenshot displays the ISC Plastic Parts website. The top navigation bar includes links for Products, Company, Contact Us, News, and Form. A search engine is prominently featured with fields for Metric thread (M4), Length, and Tolerance (+/- 0.25 mm). Below the search engine, a product detail page for a knob is shown, featuring a 3D model, a technical drawing, and a video player. The product description states: "Our male handwheel with its star-shaped head has an excellent glossy finish. It is also available as a female knob, please visit our family LHSB." A table of product specifications is also visible, listing various models and their dimensions.

Quality

Our company has the ISO9001: 2008 certification, certified by Applus. All our parts are produced in the European Union and the USA, the most respected manufacturers of plastic products. This guarantees the quality and reliability of our products.

Certifications

The UL /c - UL - us certification marks are applicable to representative samples of finished products that have been tested and evaluated according to the United States and/or the Canadian security norms, based mainly upon the Security Norms Published by Underwriters Laboratories.

The UL Recognized Component mark can be used in parts of components that are part of a larger product system. These components may have performance restrictions or their assembly can be incomplete.

Certification of compliance with the Canadian Standards Association norms, on security of electronic parts and/or equipments.

EN 50 262

Cable glands with metric screw for electricity/wiring applications, according to the european EN 50262 norm.

EN 60 529: IP54

EN 60 529: IP65

EN 60 529: IP67

EN 60 529: IP68

Classifies the degrees of protection provided by the enclosures of electrical equipment (IP), according to the European EN 60529 norm.

Norms Compliance

This certification of the raw material indicates its compliance with the 2002/95/EC norm (Restriction of the use of certain Hazardous Substances).

UL94 V2/V0/HB

This certification of the raw material specifies its degree of resistance to fire (flammability, ignition resistance, flame extinction...), according to the security norms published by Underwriters Laboratories.
