The 15000 Series Standard Vac-U-Lift® Vacuum Lifter is designed for the efficient handling of a large variety of non-porous loads. 15000 Series Lifter consist of dual, interchangeable 7600 Series Power Pacs or a PP300 Series Power Pac mounted on a cross reinforced, steel double-girder load beam. The modular design features cross arms and vacuum pads that can be rearranged to fit various material specifications without modifications or design changes required in the unit itself. Trolley-mounted cross arms are pin-locked and completely adjustable along the beam length. Re-positioning of vacuum pads on cross arms can also be accomplished quickly and easily.

Note: customer must verify what voltage the machine is set at prior to connecting electrical and running machine
