Partnering with **espi**, our clients have built stronger enterprises and collectively realized millions of dollars in cost reductions and process improvements, while adding and/or retaining thousands of jobs.

Facility Planning & Design

Optimizing your largest asset

espi combines practical experience with applicable analysis to optimize your workflow. **espi** can help you build an effective plan that meets your needs and specifications for renovation or expansion of existing or new building construction.

Our focus promotes lean manufacturing and flow technology principles that streamline your workflow. Establishing improved work center design will foster higher productivity and create a safer work environment.

espi will partner with you to determine current and future facility size, coordinate site selection, evaluate contractors, and manage the project. Our experts are focused on establishing and controlling your budget and dealing with any issues to ensure on-time and successful facility completion.

Our services include:

- Site Selection
- Flow Analysis
- Facility Sizing
- New Facility Layout & Design
- Warehouse Design
- Plant Optimization
- Design-Build Management
- Productivity Improvements

Strategy and Innovation

Innovation with Intent

We emphasize the importance of innovating with intent. Through our approach, innovation aligns with and reinforces strategy. In order to achieve this, we work with enterprise leaders to develop a solid business model which lays out a clear value proposition for customers. This becomes the framework for concrete action and sets a direction for innovation development.

We help organizations set up processes for each phase of innovation: ideation and discovery, delivery and commercialization. We have demonstrated that successful delivery of innovation is not a function of mysterious secrets but the result of following proven approaches and applying effective tools. We coach leaders and managers in the enterprise on implementing these processes and developing proficiency in the right tools.

Our services include:

- **Strategic Planning**
- **Project Management**
- **Portfolio Management**
- **New Product Development**
- **Innovation Delivery**

Systems & Information Technology

Technology that supports your strategy

All businesses are experiencing significant change from digitization of the workplace. Those organizations that are embracing this change and leveraging it for competitive positioning will survive and thrive.

Turn to **espi** to simplify, modernize, and optimize your systems and technology. With our experience in systems and technology our clients have successfully transformed their business and converted data to decisions.

Operational Excellence

Improving your processes for success

espi helps organizations improve their operational performance through evaluating and re-engineering their business processes. **espi** has helped numerous organizations improve their productivity and operational efficiency, reduce costs, establish and improve process quality, and increase asset utilization by utilizing the right tools to identify and implement improvements.

espi helps you to successfully reduce costs, improve productivity, and streamline workflow by applying proven methodologies and principles. We create an ongoing environment of improvement by defining and instituting responsibilities to all personnel so they take ownership of a culture of Continuous Improvement.

Our services include:

- Plant Optimization
- Strategic Planning
- Continuous Improvement
- Facility Planning
- Operational Improvements
- Sales & Operations Planning
- Supply Chain Management
- Profitability Improvement

Training and Development

Custom training that delivers

espi can introduce, or refresh, programs such as Continuous Improvement, 5S, Project Management, New Product Introduction, and information system user training to your company and employees. Our flexible training solutions will help you to reduce training time and costs that satisfy your immediate and long-term goals.

Training is a vital component to any organization's overall success. **espi** can integrate your organization's processes and procedures into customized learning packages that deliver greater knowledge retention and skill application. By capturing and documenting "Best Practices", **espi** helps you to accelerate new employee training, as well as re-train and develop current employees.

Our training services include:

- Leadership Development
- Continuous Improvement
- Facility Planning & Layout
- Supply Chain
- Sales & Operational Planning
- Information System User
- New Product Introduction
- Project Management Development
