Feed Pressure, Infinitely Variable 0-400 lbs  
Main Motor 7.5 HP  
Machine Weight 7,500 lbs  
Machine Voltage 240-3-60

This machine was totally rebuilt 5 years ago. I recently took it in trade when the customer bought a new PA22 machine. We recently changed the gear oil and hydraulic oil and cleaned the tank. Cleaned the lubricating system on the shuttle and installed a new coolant pump. We also fixed any hydraulic leads and re-machined the discharge table and put a new insert into it. This machine has also been repainted.

Once machine is placed in your shop and wired, MP inc. will level and assemble it. We will also instruct your operators.

**Customer must connect machine to main power**

**Sale price does not include sales tax. In the event that this purchase is not taxable, please provide a tax exempt certification.**
