Patent #5572926

Bachhuber's Press Unloaders increase your production. When connected to the ram, these press unloaders maximize your employee's production. With this simple mechanical design you can easily automate your application, to offer fast, safe, and quiet removal of parts from your top knockout die. Using the auto-disconnect feature, the tray is released out of the way, making it possible to load parts for deep drawing or trimming. Automating your application will increase production and pay for themselves in a short time.

FEATURES

- Includes tray and mounting brackets.
- Fully adjustable angle and height.
- Tray positioning.
- Lubrication free pivot points.
- Easy set-up.
- Stock items, 1 to 2 weeks delivery.
- *Design for your special applications as well!*
