

MODEL 88G
Magnet Wire Stripper

The Model 88G efficiently strips miniature coils and fine magnet wire by rotating cone-shaped stripping wheels. Our unique Twincone® Wheel design makes close stripping easier on all types of film insulations.

MODEL 27G
Magnet Wire Stripper

The Model 27G strips magnet wires, coils, and resistor leads to within .031" (.8mm) of the component body. The rotating slotted insert removes the film insulation to a square, clean edge.

MODEL 75
Wire & Coax Stripper

The Model 75 Compu-Strip® is a fully programmable bench top coaxial & triaxial cable stripper that utilizes unique orbiting blade technology. The orbiting blade technology greatly increases blade life and ensures clean, square strips.

MODEL 74F
Coax Stripper

The Model 74F is a triple head rotary wire stripper that provides a three-stage strip on a multitude of different cable types. Coax, hookup, and small multi-conductor cables can all be processed with this versatile bench-top machine.

Cost-effective equipment leasing programs available on some models.

Send in your wire samples for a FREE EVALUATION!

CARPENTER MFG. CO., INC
110 Fairgrounds Drive, Manlius, NY 13104 U.S.A.

Send us approximately 25 feet of your material. We'll process it and return finished samples to you along with a formal machine quotation.

PRODUCTION-PROVEN WIRE STRIPPING & CUTTING SOLUTIONS

Designing, manufacturing, & marketing quality products for over 60 years.

CARPENTERMFG.COM

QUALITY. DURABILITY. COST EFFICIENCY.

For over 60 years, we have designed and built quality, American-made products for all your wire stripping & cutting needs. Let one of Carpenter's experienced application technicians help you find a solution today! Call: 315.682.9176 or email: sales@carpentermfg.com.

AUTOMATIC CUT & STRIP

MODEL 970
Automatic Cut & Strip Machine

The Model 970 Compu-Strip® is a fully programmable bench top measure, cut & strip machine utilizing high torque stepper motors, belt feed/roller feed material transport, and a precision ball screw-blade mechanism.

MODEL 930
Automatic Cut & Strip Machine

The Model 930 Compu-Strip® offers excellent affordability in an all-electric bench top measure, cut & strip machine. This unit incorporates the use of high torque stepper motors, a precision ball screw-blade mechanism, and user-friendly electronic control.

MODEL 78A
Pneumatic Wire Stripper

The Model 78A Pneumatic Wire Stripper quickly and accurately strips a broad range of wires and cables. This compact unit has calibrated adjustments for wire diameter, strip length, and pull length, making for easy operation and change-over.

MODEL 70D
Wire Stripper

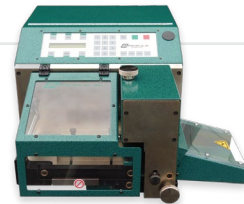

The Model 70D Twin Swing Blade Rotary Wire Stripper comes equipped with a twin blade faceplate, which is designed to strip difficult insulation such as thin walled, shielded, coax, Teflon, Kynar, etc.

AUTOMATIC CUTTERS

MODEL 36B
Round Material Cutter

The Model 36A Compu-Cut® provides accurate cuts on a broad range of wire, cable, flexible, and rigid tubing. The material is supported on both sides of the cutting blade, ensuring clean, square cuts.

MODEL 42C
Wire & Tubing Cutter

The Model 42C Compu-Cut® is a powerful high performance measure and cut machine designed for use on a broad range of materials. This versatile unit is easy to use, fast, and accurate.

LARGE CABLE STRIPPERS

MODEL 77E
Cable Stripper

The Model 77E Pneumatic Cable Stripper easily strips difficult extruded-type insulations such as those found on high voltage, welding, multi-conductor, and battery cables. It utilizes a scale-style strip length adjustment, plus a micrometer control for blade depth settings.

MODEL 72D
Wire Stripper

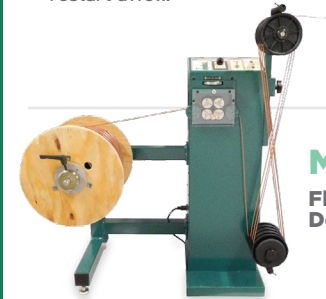

The Model 72D strips larger cables, with thick or thin insulations. Single conductor, multi-conductor, and coaxial type cables can all be processed with this unit. The rotary blade action provides a clean, square strip.

PERIPHERALS & ACCESSORIES

MODEL 80
Single Bowl Wire & Cable Coiler

The new Model 80 neatly coils long lengths of wire and cable. When interfaced with Carpenter Measure & Cut or Measure, Cut, & Strip equipment, it will automatically stop and start. The user-friendly electronic key pad controls bowl speed, discharge spin time, and restart dwell.

MODEL 58D
Floor Stand Prefeed De-Reeler

The Model 58D assists in the de-reeling of material before entering a Bench Top Wire Processing Machine. The powerful belt feed wire transport eliminates the strain of pulling material from heavy spools, thus improving the accuracy of your wire processing equipment. This unit comes standard with an Accumulator Weight Kit to aid in the delivery of large diameter or solid core cables.

WIRE CRIMPER

MODEL 62A
Wire Crimper

The Model 62A Accu-Crimp® is a portable bench top pneumatic terminal crimper designed to crimp loose terminals onto hookup wire, coaxial, and flat modular telecommunications cable.
