Zani: ready for quality and durability?

Hereby I take the opportunity to introduce **ZANI SPA METAL FORMING MACHINES** and its products. **ZANI** is an Italian company which has been designing and producing **presses for sheet metal forming** since 1960, with applications in different fields: **automotive, appliances, electronics, furniture and renewable energies.**

ZANI, with headquarter in Turate, Como Province, few kilometers north of Milan and not far from the Swiss border, is managed by the Zaffaroni's family now turned into the 3rd generation.

Thanks to the organizational and technical know-how, ZANI is able to respond with dynamism and adaptability to the new market's requirements, knowing perfectly that **every customer is unique.**

For this reason our machines, collected in three product families, are designed and realized on customer specifications.

POWER MASTER

Our eccentric presses with capacity up to 630 Ton, 400 mm stroke length, and bolster up to 4000 mm

MOTION MASTER

Our link motion presses with different leverage systems with capacity up to 2500 Ton, 800 mm stroke length and up to 7000 mm bolster

SERVO MASTER

Our Servo presses with capacity up to 3200 Ton, 800 mm stroke length and bolster up to 7000 mm. Provided with one or more torque motors, directly linked to the kinematic, without flywheel and clutch, this kind of machines can reproduce any law of movement.

Moreover, we are able to supply **complete lines**, including **coil line, transfer, automation systems** and several solutions for **quick die change**, from the simplest brackets, to the most complex T-track systems.

In any case for your interest and curiosity I invite you to click on the below links and have a look on our catalogues/photos/videos/ etc
