Benefit from the experience of the inventor

KABELSCHLEPP is a long standing global player in the field of cable and hose carrier systems. The story of our success began in 1954 with the invention of the steel cable carrier.

A world market has since grown out of our idea and we have continued to set the standard in the market with our innovative solutions.

Application examples

Cable carrier systems are now an integrated part of the machine tool or a material handling equipment which gives

un-interrupted supply of power, data and control signals to the machinery.
