

Dear Customers,

Thank you very much for your inquiry and your interest in further details of our products and our company. Now let me introduce our company **Hengda CNC**.

Yangzhou **Hengda CNC** Machine Co., Ltd. is a professional manufacturer engaged in design and production CNC Machining Centers with 15 years' experience. Our company is located in Yangzhou city, China, 280kms distance from Shanghai.

Our main product is vertical CNC machining center (VMC), we have a wide range product line from smallest type **M540** to biggest **V1580**, below pictures are some of our product. Note: the color of machine can be customized.

Hengda CNC Professional CNC Manufacturer

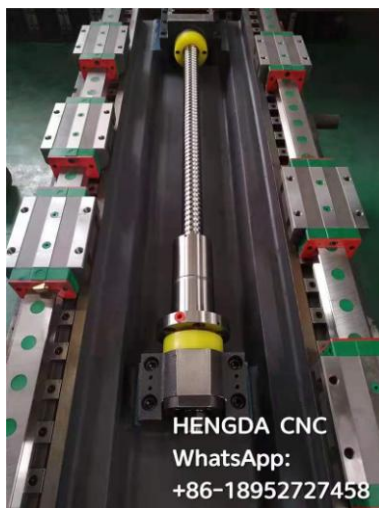

We have gantry type grinder and gantry type machining center to make metal processing on the CNC machining center frames. We install the frames ourselves and our skillful workers are trained by Taiwan experts. Our engineers install, test and optimize the control system ourselves.

All these professional works ensure our product have best quality and competitive price. And since we are really factory not trading company so we can provide real professional after sale service. Our products all have one year warranty and life time remote technical support service.

Hengda CNC machining centers have high cost performance configurations, such as:

1. Taiwan brand Royal or Kenturn spindle, 6000-12000rpm optional,
2. Taiwan brand Hiwin or PMI P4 precision grade linear guideway and C3 precision grade ball screw,

3. Japan brand Koyo bearings,
4. Taiwan brand Okada or Relib tool magazine,
5. Taiwan brand Airtag or Mindman pneumatic components,
6. Taiwan brand Ishan or Baotn automatic lubricator,

7. Schneider electrical components,
8. Japan brand Omron 24V DC supply,
9. Spindle motor and all servo motors are same brand as the controller,
10. Fanuc, Mitsubishi, Siemens or GSK controller optional.

We make test cutting, Renishaw laser interferometer accuracy checking and ball bar circular checking after production. We provide mechanical and laser accuracy report to our customers.

Hengda CNC

Professional CNC Manufacturer

Also we provide optional accessories to our customers:

4th/5th axis rotary table, tool setting probe, CTS, chip conveyor, oil skimmer, etc.

We make antirust painting on the machine and packed the machine with wooden case to suit for long distance sea transport. Type M540 to V1160 can put into normal 40HQ container, type V1270 to V1580 need flat rack to carry.

Hengda CNC machining centers have exported to over 25 countries. In Korea, in Turkey, in Italy, in Poland, in Indonesia, our products have won the full trust of customers with competitive price, reliable quality, excellent processing accuracy, convenient after-sales service and affordable spare parts.

Hengda CNC

Professional CNC Manufacturer

Thank you very much for your patience in reading the introduction. In you need more information about our CNC machining centers and our factory, please visit our Facebook page <https://www.facebook.com/hengdacncmachine>. Also please add my WhatsApp number +86-18952727458, we can discuss more details about the machine.

Now our machines are continuously hot sale, we are sorry that we really have no stock, no immediately delivery. If you need to purchase our machines, please order in advance at least one month, thank you for your understanding and cooperation!
