## ► Filter belt system – FBS Professional recycling of dirty water

Individual and turnkey solutions tailored to your needs

Even the basic model of the FBS 1000 is designed for the treatment of about 50-70% of the resulting wash water, which in turn can be used for the cleaning process.

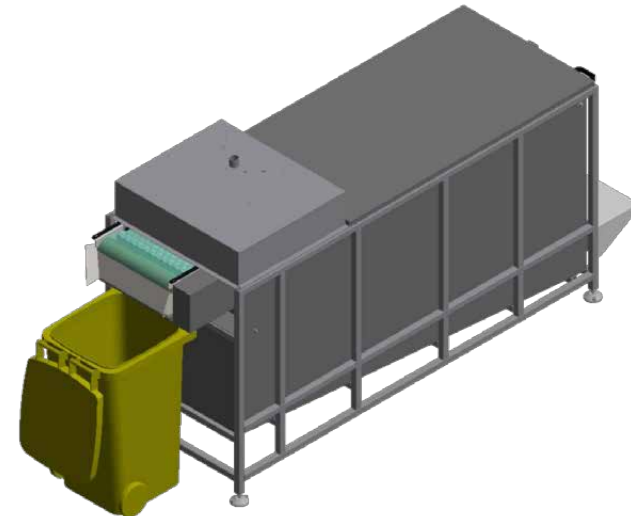

Equipped with a premium package, recycling rates of up to 95% are even achieved.

**p** Your advantage:  
Filtration of the dirty water for the discharge of the sewer.

Lower costs for container cleaning due to lower consumption of fresh water
