ABOUT WIN SOURCE

As an industry-leading distributor of electronic components, WIN SOURCE strives for excellence and keeps improving our components and product requirements. We have been widely recognized by many third-party qualification

certification and industry organizations. We promise to strictly control product quality and provide reliable quality.

We have always been consistent since 1999, dedicated to assisting our customers to quickly and accurately find obsolete, end-of-life, and hard-to-find electronic parts, also offering a wide range of common-used materials with cost-saving supply chain management.

When companies are unable to fulfill their requirements through the normal franchise channels, they turn to WIN SOURCE for immediate solutions.

We profoundly understand the difficulty of sourcing obsolete electronic components. Based on this challenge, we consistently utilize our in-stock inventory and the global network of suppliers to reduce your procurement cycles, lower transaction costs and provide quality electronic components at competitive prices. Today, the stock in our warehouse is more than 1,120,000 SKUs, separately saved and maintained within our ESD-S20.20 protected facility - Shenzhen, Hongkong, and the Philip-pines.

THE WORLD'S LEADING ELECTRONIC COMPONENTS DISTRIBUTOR

All operations at WIN SOURCE are AS9120B, ISO9001 & ISO14001 & ISO45001 & ISO13485 & ISO28000 & ISO37001 & ISO22301 certified, including order entry, customer service, receiving, picking, shipping, purchasing and inventory. As a member of ERAI(an authorized anti-counterfeiting organization) & ASA association & IPC association & SMTA & SEMI association, we always adhere to the excellent quality of electronic components and put an end to all fake and shoddy products.

In the future, we will continue to grow globally and focus on providing the widest selection of in-stock electronic parts, accomplishing through our commitment to continual improvement of our processes, services, products, and our people, insisting our innovation-driven business philosophy, gratifying and astonishing customers with our customer service excellence, order accuracy and on-time delivery.

MEMBERSHIPS AND AFFILIATIONS

Founded in 1995, ERAI, Inc. is a global information services organization that monitors, investigates, and reports issues affecting the global electronics supply chain and provides its global members with supply chain risk mitigation solutions. As a member of ERAI, we keep abreast of counterfeit, defective, high-risk models and other information.

MI supports the established Semiconductor Manufacturing and supply chain communities with activities that encourage innovation, communication, and collaboration.

SEMI is the global industry association representing the electronics manufacturing and design supply chain, connecting more than 2,500 members and 1.3 million professionals worldwide. SEMI members are responsible for the innovations, and services that enable smarter, more powerful, and more affordable electronic products.

IPC is a global trade association dedicated to furthering the competitive excellence and financial success of its members, who are participants in the electronics industry. As a member of IPC, we provide more reliable, high-quality products through the use of services such as IPC standards, certification, and training.

The purpose of the PSMA is to enhance the standing and reputation of its members and their products, enhance their knowledge of power-related technologies and other developments, and educate the entire electronics industry, academia, government, and industry bodies about the importance and related applications.

Established on February 25, 1993, the Aviation Suppliers Association (ASA), based in Washington, D.C., is a not-for-profit association, representing more than 685 global member companies. WINSOURCE's ASA Association membership helps us stay up to date with the regulations to follow in the aerospace parts supply industry.

Optica is dedicated to promoting the generation, application, archiving, and dissemination of knowledge in optics and photonics worldwide. Optica's renowned publications, meetings, online resources, and in-person activities fuel discoveries, and shape real-life applications, and educational achievement.

SMTA offers exclusive access to global communities of experts as well as accumulated research and training materials from thousands of companies dedicated to advancing the electronics industry. Our SMTA membership supports our mission to advance technical knowledge through conferences, training, and so on.

International Microelectronics
Assembly & Packaging Society

The International Microelectronics Assembly and Packaging Society (IMAPS) is the largest society dedicated to the advancement and growth of microelectronics and electronics packaging technologies through professional education.

OUR CERTIFICATIONS

The full name of the ISO13485:2003 standard is "Medical device-Quality management system-requirements for regulatory", which puts forward special requirements for the quality management system of medical device manufacturers. This certification improves and guarantees the quality level of WIN SOURCE's products and effectively reduces the risk of quality accidents or adverse events.

AS9120 is a standard with special requirements added on the basis of ISO9001:2000, which is suitable for aviation warehousing and retail organizations. It elevates our quality management system to the global standard adopted by the aerospace industry (IAQG).

At present, in terms of information security management, the British standard ISO27001:2005 has become the most widely used and typical information security management standard in the world. It can enhance the credibility of electronic e-commerce transactions between organizations and can build mutual trust between websites and trading partners.

ISO9001:2015 is a quality management system standard formulated by the International Organization for Standardization (ISO). The standard absorbs international advanced quality management concepts. We follow a strict quality management system to provide trustworthy electronic components.

As an anti-bribery compliance management tool, the ISO37001 standard is designed to help organizations fight bribery risks on their own merits and guide organizations to establish business systems and frameworks for managing potential bribery risks to prevent, detect, and respond to bribery risks. This is achieved by instilling an anti-bribery culture in the organization and having appropriate controls in place. It sets out a list of measures to help organizations prevent, monitor and deal with bribery.

ISO 14001 is a voluntary international standard created in 1996 by the International Organization for Standardization (ISO) and forms parts of the ISO 14000 series of environmental standards. We have obtained an environmental management system certification and are committed to creating a green business.

ISO22301 can help enterprises formulate a set of integrated management process plans so that enterprises can identify and analyze potential disasters. It helps to identify the threats to business operations caused by possible shocks and provides an effective management mechanism to prevent or offset these threats and reduce the losses caused by disaster events to the business.

ISO 45001 is an ISO standard for management systems of occupational health and safety (OHS), published in March 2018. The goal of ISO 45001 is the reduction of occupational injuries and diseases, including promoting and protecting physical and mental health. We pay attention to building a safe workplace and care about the occupational health and safety of employees.

ISO28000 was developed and proposed in response to the needs of the transportation and logistics industry for common safety management standards, with the ultimate goal of improving the overall safety of the supply chain. We value product quality and ensure compliance with the requirements of the transport and logistics industry.

ISO 37301 is a technical framework that provides standards and a certifiable benchmark for compliance management systems around the globe. ISO introduced the framework in April 2021, outlining how organizations can configure their CMS to meet various legal regulations.

At present, in terms of information security management, the British standard ISO27001:2005 has become the most widely used and typical information security management standard in the world. It can enhance the credibility of electronic e-commerce transactions between organizations and can build mutual trust between websites and trading partners.

The ISO/IEC 20000-1:2018 is a global standard for managing IT services, outlining the requirements for creating, implementing, monitoring, maintaining, and enhancing an IT service management system. The ISO/IEC 20000-1:2018 is the only certification standard in the ISO/IEC 20000 family.

ADVANTAGES

01 Top Rank Electronic Parts Online Store Since 1999

WIN SOURCE has become the largest electronic components online store in Asia. With more than 23 years of experience, WIN SOURCE is dedicated to creating a humanized platform for customers (from best-in-class search and e-procurement engines, simple and up-to-date product information to 24/7 service), where buyers can get instant access to ready-to-ship safety stock and complete procurement easily with a few quick clicks, rather than frantically calling sources from around the world for parts.

02 Huge Inventory of 1 Million+ Components from 3000+ Manufacturers

WIN SOURCE has access to thousands and thousands of electronic parts. We carry top manufacturers, such as Texas Instruments, Analog Devices

Inc., On Semiconductor, Airborn, STMicroelectronics, and Intel. So whenever you want any kind of components, WIN SOURCE can provide you with the best products, which are available for immediate shipment, so that you will require what you want through in-time delivery and cost-saving prices.

03 Save 30% Cost of Regular Items Easy to find Obsolete

Rather than having our customers search globally for EOL electronic components, which is time-consuming and risky, we immediately link existing inventory to your shortages. Whether you are eager to shorten delivery times, or looking for obsolete and/or end-of-life electronic components, and/or other hard-to-find electronic components, WIN SOURCE has the expertise to address material shortages.

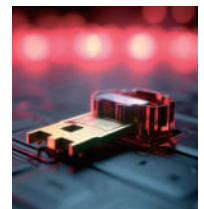

04 Comprehensive and Considerate After-Sales Service

- A. 24 hours shipment
Parts in stock are available for immediate delivery. At any given time, more than 1,120,000 products are in stock and ready to be shipped from WIN SOURCE warehouses. That means there are no lead times for in-stock products.
- B. 3 Years Warranty
Any kind of components you purchase from WIN SOURCE carries 3 years Warranty.

05 BOM Tool Program 20 Million ECAD Module Download Free

In addition to services of managed inventory and in-time shipment, WIN SOURCE also serves BOM tool for you. Whenever you need a quick quote, just submit the BOM list to our professional team. WIN SOURCE's veteran employees will offer the most suitable BOM list to you. This can not only be used as a quotation reference but also to track the material situation.

WIN SOURCE ONLINE STORE

Founded in 1999, WIN SOURCE focuses on optimizing procurement chains in the electronics industry with over 23 years of experience. With more than 3000 manufacturers and over 1 million+ SKUs, WIN SOURCE provides one-stop online services, for procuring electronic components for global B2B customers through our widespread supply chains. Moreover, we are committed to guaranteeing 24-hour delivery and a 3-year warranty. Depending on our data IT service platform, WIN SOURCE is dedicated to meeting customers' demands to achieve one-stop BOM procurement, quickly acquire obsolete inventory, and continuously reduce procurement and production costs.

Regular | Basic Parts

Obsolete | End-Of-Life

Shortage | Urgent-Used

24 Hours Delivery

Parts in stock are available for immediate delivery. At any given time, more than **1 million+** products are in stock and ready to be shipped.

24 Years Supply Chain Experience

WIN SOURCE are always consistent since 1999.

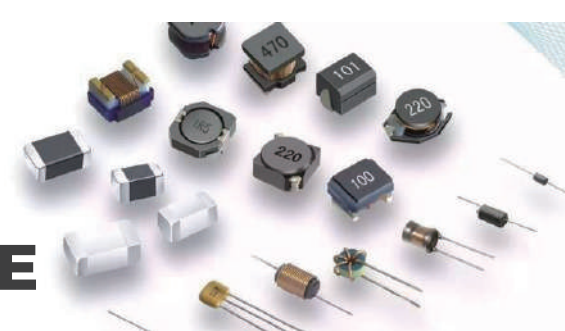

3 Years Warranty

The electronic components you purchase include **3 Years Warranty**. We guarantee product quality.

LINE CARD

At WIN SOURCE, we stock about 1,120,000 SKUs of electronic components from over 3000+ manufacturers. We provide detailed information about the manufacturer, and the parts we stock, as well as product datasheets and tech support phone numbers. Browse our inventory by the manufacturer to find the parts to keep your production running smoothly. Once you determine the specific part you are looking for, use our global part search utility to check stock, order parts, or submit a request for a quote.
