

International Components Group Inc.

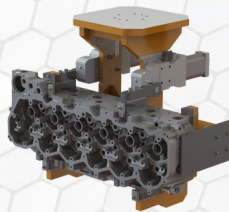

**Manufacturing and Automation
Support Services**

International Components Group Inc. is a customer-centric professional sales agency committed to supporting our clients. We specialize in delivering top-tier products and innovative solutions from leading global manufacturers and service providers.

In addition, with over 35 years experience in the machine tool and automation industry we specialize in the design and build of robotic end-of-arm-tooling (EOAT). We pride ourselves on being the go-to partner for small-scale projects that larger vendors may overlook. Whether it's crafting new designs and builds for specialized tooling needs or reverse engineering existing tooling, we've got you covered.

Mechanical solutions we offer:

- Conveyors
- End-of-arm-tooling EOAT
- Head stock / tail stock
- Pallet dispensers
- Robot risers
- Robot/machine cell guarding
- Robot transfer units (RTU)
- Tombstone fixtures
- Weld Starter Kits
 - Single station enclosed weld cells
 - Two station enclosed weld cells
 - 180 degree index enclosed weld cells
