

As **GMR Engineering** in the field of CNC cutting technologies, we continue to develop efficiency-enhancing solutions with our vision to support manufacturing industries and are proud to export to more than 25 countries. Direct manufacturer and professional engineering experience since 1994 with a wide range of customized CNC cutting machines and professional cutting wire solutions.

Materials that our machines can cut

Rock wool - Glass wool - Foam glass - Styrofoam (EPS) - (PU) polyurethane - Ytong (aerated concrete) - XPS - Sponge - Fibers - EPP - Acrylic (PMMA) - Polyester - Nylon etc. Synthetic materials

Material cutting solutions for various industries

GMR Engineering; cutting and forming machines for the most important materials in many different sectors, such as the manufacturing industry, construction industry, automotive industry, furniture industry and textile industry. You can discover cutting machines for rock wool, glass wool, aerated concrete, plasterboard, polystyrene, EPS, XPS, sponge, leather, fabric, cellular glass, cork and many other materials or describe your project in detail by sending us a special design request. We are able to manufacture CNC controlled, mechanical or manual machines for all types of requirements.
