PROFILE CATALOGUE

ABOUT US

ROCKPETERS Nigeria Limited was fully incorporated in 1986 to do business in Nigeria. Over the years, the name ROCKPETERS has established itself as an integrated commercial, service- oriented organisation. We have positioned ourselves as one of the leading providers of engineering equipments, tools and hardware to different sectors.

Sensing the significant developments that were imminent in infrastructure, construction, industrial and manufacturing areas, we operate this independent division to manage all the above sectors. Today, we carry more than 50,000 items in stock.

Businesses and institutions depend on us every day as their major source of engineering tools and equipments procurement needs. The breadth and availability of our product line is a key factor that differentiates ROCKPETERS from other industrial vendors.

Our extensive product categories and wide networks enable us to meet customer requirements in totality. For products not readily available in our showroom or warehouses, we source and ship based on customer's requirements.

Over the years, we have achieved a privileged reputation as a vendor of choice to our many clients. This has made many of our clients focus exclusively on their core business and operations.

VISION

To be the number one engineering tools, equipment and building solutions supplier in Africa.

MISSION

- Offering reliable and innovative products and services
- Providing exceptional quality and value to our customers
- Empowering our employees to achieve their full potential
- Develop lasting partnerships with our principals and suppliers
- Generate long-term value for all our stakeholders
