

Your next-generation medical devices are taking shape at Veridiam Medical.

As the push for minimally invasive procedures continues, Veridiam Medical offers sophisticated tubing solutions – including precision, thin-wall tubing and cannulated bar made of ultra-strong, newly developed biocompatible alloys. We also provide vertically integrated production and engineering capabilities that include:

- ▶ **Rapid Prototype** with fast turnaround to satisfy production schedules and speed to market.
- ▶ **Material Selection & Design for Manufacturability** based on 50 years of experience in designing for optimum manufacturability.
- ▶ **Assembly & Sub-Assembly** contract manufacturing services, with vertical integration for greater ROI.
- ▶ **Machining Capabilities** that include CNC Swiss machining, laser cutting and EDM for precise manufacturing.
- ▶ **Quality Control** developed to nuclear quality standards, coupled with our intimate knowledge of Medical Device requirements.
